---

Good afternoon Jane-

Please find the attached updated scope of work/timeline for the MAARNG Copper fate and transport study.

We are still trying to come up with some dates for a walkthrough on Camp Edwards. Once we have them I will send them over to you.

As always if you have any questions please do not hesitate to reach out to me.

Thank you.

Keith

Great! Glad you received it ok. The MAARNG looks forward to USEPA's comments.

I'll check availability with the team for a site visit at Camp Edwards and get back to you with some dates.

Yes the Copper Leaching Study will be conducted on an expedited schedule.

Meeting minutes are created for every CAC, SAC and EMC meeting. I'll be sure that you receive them from each of the respective meetings.

Keith

Thank You Very Much Keith

This is an important document which sets the stage for future maintenance and monitoring of the proposed MPMGR . We will complete a review and get back to you with follow up. I would be interested in hearing the feedback from SAB and CAC - I assume that notes will be available - Please confirm or provide suggested means to get this external feedback.

Similarly, the Copper Leaching Study and interim reports will provide critical information for our overall project review. While awaiting the amended scope of work I hope the work has been initiated on an expedited schedule. Please confirm.

Finally, now that the Monitoring Plan has been submitted, I believe that this is an appropriate time to discuss a field visit. Do you want to propose some dates and I will coordinate with the EPA team?

Have a Good Week  
Jane

Subject: MAARNG Monitoring Plan

Good morning Jane-

Please find the attached Massachusetts Army National Guard (MAARNG) Camp Edwards Multi-Purpose Machine Gun Range specific Monitoring Plan. It has been developed with review and comment from the Environmental Management Commission Executive Officer Len Pinaud. It is awaiting final presentation to the Science Advisory Committee and the Community Advisory Council and final approval from the Environmental Management Commission hence "Final Draft".

We are still awaiting the final scope and timeline from the Army Corps of Engineers on the Copper Fate and Transport study. Once received I will forward that to you.

If there is anything else you need or have any questions please let me know.

Keith
