## SUBMITTED ELECTRONICALLY, VIA EMAIL

Subject: Franklin Power, LLC/Riverbend HYDROGP Permit Application: NHG360023

To whom it may concern:

Eagle Creek Northeast I, LLC herein submits a HYDROGP renewal application for the existing HYDROGP permit, NHG360023. The purpose of this request is to renew our existing HYDROGP Permit at the Franklin Power LLC/Riverbend Hydro Project ("the facility") located in Franklin, New Hampshire.

Please find enclosed, one (1) copy of the completed HYDRO General Permit Notice of Intent (NOI) application for the facility with all required documents. Contained within this application package is:

- Complete HYDRO General Permit Notice of Intent (NOI)
- Flow Schematic Line Drawing
- USFWS Letter of No Effect Determination
- Topographic map

Please be assured of the Licensee's continued cooperation in this matter. If you have any questions regarding this submittal, please contact myself at (973) 998-8169 or <a href="mailto:erica.liguori@eaglecreekre.com">erica.liguori@eaglecreekre.com</a>.

Sincerely,

Erica Liguori

Environmental Coordinator Eagle Creek Northeast I, LLC.

Crica Liguori

CC: Corey Colby; Regional Manager
Michael Craig; Divisional Manager

Mark Gross; Senior Vice President, Operations

## II. Suggested Format for the HYDRO General Permit Notice of Intent (NOI):

Request for General Permit Authorization to Discharge Wastewater Notice of Intent (NOI) to be covered by Hydroelectric Generating Facilities General Permit (HYDROGP) No. MAG360000 or NHG360000

Indicate Applicable General Permit for Dis	scharge(s): $\square$ MAG360000 $\square$ N	THG360000		
A. Facility Information				
1. Facility Location	Name:			
	Street:			
	City:	State:		
	Zip:	SIC Code:		
	Latitude:	Longitude:		
	Type of Business:			
2. Facility Mailing Address (if different from Location)	Street:			
	City:	State:		
	Zip:			
3. Facility Owner	Name:	Email:		
	Street:	Telephone:		

	City:	State:		
	Contact Person:	Zip:		
4. Facility Operator (if different from above)	Name:	Email:		
	Street: Telephone		<del>:</del>	
	City:	State:		
	Zip:			
5. Current Permit Status	Has prior HYDROGP coverage been granted for the discharge(s) listed in the NOI?		☐ Yes	□ No
	Permit number (if yes):			
	Is the facility covered under an Individual Permit?		□ Yes	□ No
	Is there a pending NPDES application of file with EPA for the discharge(s)?		□ Yes	□ No
	Date of Submittal (if yes):		mit Number (if known):	
	Attach a topographic map indicating the locations. of the facility and outfall(s) to the receiving water		☐ Map Attached	
	Number of turbines:			
	Combined turbine discharge (installed		ım capacity?	cfs
	capacity) at:	Minimu	m capacity?	cfs
	Is this facility operated as a pump storage projection	ct?	☐ Yes	□ No

**B.** Discharge Information 1. Name of Receiving Water(s): Freshwater 

Marine 2. Waterbody classification: ☐ Class A ☐ Class B ☐ Class SA Class SB Is the receiving water is listed in the State's Integrated List of Waters (i.e., CWA Section 3. □ Yes  $\square$  No 303(d))? If the applicant answered yes to B.3, has the applicant identified the designated uses that are □ Yes  $\square$  No impaired, any pollutants indicated, and whether a final TMDL is available for any of the indicated pollutants in a separate attachment to the NOI? Attach a line drawing or flow schematic showing water flow through the facility including 5. ☐ Line Drawing Attached location of intake(s), operations contributing to effluent flow, treatment units, outfalls, and receiving water(s). List each outfall (numbered sequentially) discharging effluent from the following categories and provide an estimate of the average 6. monthly flow (in gallons per day) for each discharge type. See Parts 1.1 through 1.5 (for MA) or Parts 2.1 through 2.5 (for NH) for descriptions and permit conditions for each discharge type. Equipment-related cooling water Outfalls: gpd Equipment and floor drain water Outfalls: gpd Maintenance-related water Outfalls: gpd Facility maintenance-related water Outfalls: gpd during flood/high water events

Outfalls:

Equipment-related backwash strainer

water

gpd

7. For each outfall listed above, provide the following information (attach additional sheets if necessary). Outfalls may be eligible for alternative pH effluent limits. See Parts 1.7.l. and 2.7.l of the permit for additional information. Contact MassDEP or NHDES to determine the required information and protocol to request alternative pH effluent limits.			
Outfall No.	Latitude:	Longitude:	
	Discharge is: ☐ Continuous ☐ Inte	rmittent   Seasonal	
	Maximum Daily Flow MGD	Average Monthly Flow MGD	
	Maximum Daily Temperature °F	Average Monthly Temperature °F	
	Maximum Daily Oil & Grease mg/L	Average Monthly Oil & Grease mg/L	
	Maximum Monthly pH s.u.	Minimum Monthly pH s.u.	
	Alternative pH limits requested? □Yes □ No	State approval attached? ☐ Yes ☐ No	
Outfall No.	Latitude:	Longitude:	
	Discharge is: ☐ Continuous ☐ Intermittent ☐ Seasonal		
	Maximum Daily Flow MGD	Average Monthly Flow MGD	
	Maximum Daily Temperature °F	Average Monthly Temperature °F	
	Maximum Daily Oil & Grease mg/L	Average Monthly Oil & Grease mg/L	
	Maximum Monthly pH s.u.	Minimum Monthly pH s.u.	
	Alternative pH limits requested? □Yes □ No	State approval attached?   Yes   No	

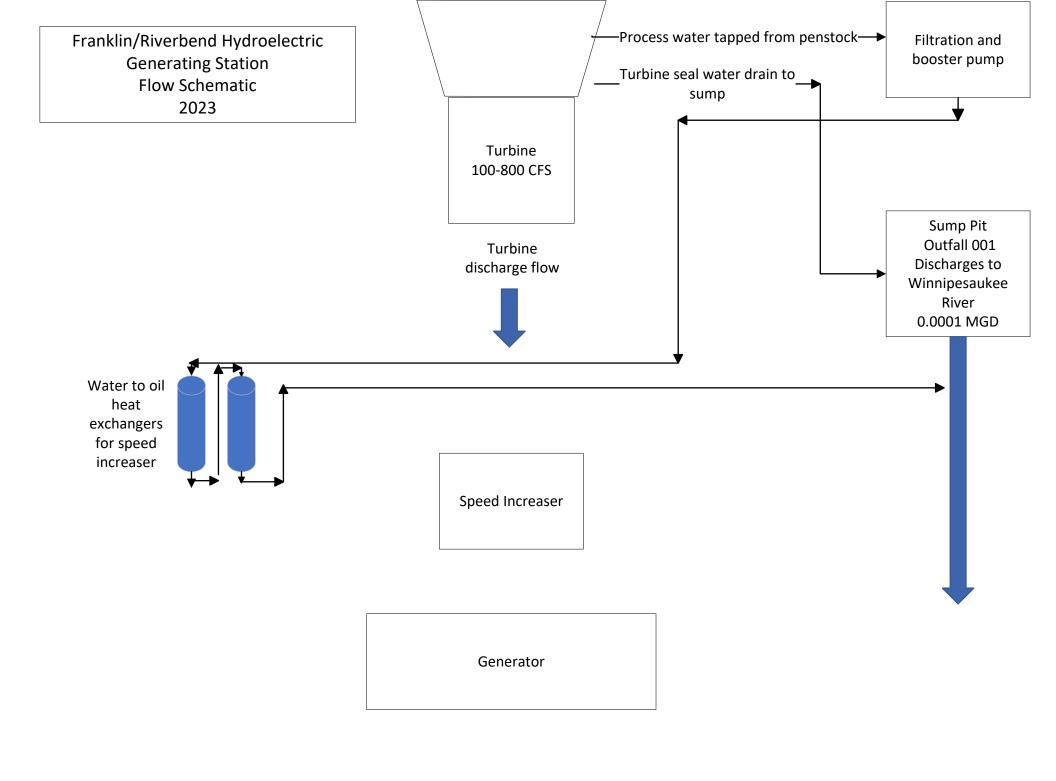

Outfall No.	Latitude:		Longitude:	
	Discharge is:   Continuous	☐ Inte	rmittent   Seasonal	
	Maximum Daily Flow	MGD	Average Monthly Flow MGD	,
	Maximum Daily Temperature	°F	Average Monthly Temperature °F	
	Maximum Daily Oil & Grease	mg/L	Average Monthly Oil & Grease mg/I	_

	Alternative pH limits requested? □Ye	es 🗆 No	State approval attached? ☐ Yes ☐ No	
C. Best Technology Availabl	e for Cooling Water Intake Structure	s		_
			Part B. of this NOI are subject to the following	
requirements.		1		
<ol> <li>Does the facility intake water for cooling purposes subject to the BTA Requirements at Part 4 of the HYDROGP?</li> <li>Yes □ No</li> <li>If no, skip to Part D of this NOI.</li> </ol>				
2. If yes, indicate which technology employed to comply with the general BTA requirements at Part 4.2.b of the HYDROGP:				
☐ An existing technology (e.g., a physical or behavioral barrier, spillway, or guidance device) that directs fish towards a				
downstream passage that minimizes exposure to the CWIS. Has the applicant attached a narrative description of the barrier to				
demonstrate that the downstream fish passage effectively transports live fish in a manner that minimizes the likelihood of				
becoming impinged or entrained at the cooling water intake?				
☐ Yes ☐ No				
			natively, at the point where cooling water enters	
penstock (for intakes located within the penstock), not to exceed 0.5 fps. Has the applicant attached a demonstration of compliance				
with this intake velocity through observation of live fish in the intake or calculation based on the maximum intake volume and				
minimum bypass flow?	es □ No			

□ For cooling water withdrawn directly from the source waterbody ( <i>i.e.</i> , not from within the penstock), a physical screen or other barrier technology with a mesh size no greater than ½-inch that minimizes the potential for adult and juvenile fish to become entrapped in the CWIS.			
Has the applicant attached a description of the technology? $\Box$ Yes $\Box$ No			
If the mesh size of the screen is greater than ½-inch has the applicant demonstrated that the calculated	l intake velocity is le	ss than	
0.5 fps based on the screen dimensions, maximum intake volume, and source water 7Q10 low flow?			
3. If the answer to question C.1 is yes, in addition to complying with one of the criteria above, the application information:	ant must submit the fol	llowing	
Maximum daily volume of cooling water withdrawn during previous five (5) years:	gpd		
Maximum monthly average volume of cooling water withdrawn during the previous five (5) years:	gpd		
Maximum daily and average monthly volume of water used exclusively for cooling: Max:	gpd Avg:	gpd	
Maximum daily and average monthly volume of water used for another process before or after being			
Max: §	gpd Avg:	gpd	
Has the applicant attached a narrative description explaining how cooling water is reused? ☐ Yes	□ No		
Volume of total intake water withdrawn and used in facility as a percentage of:			
Installed turbine capacity % Average daily flow through penstock	%		
Minimum flow through penstock %			
Source water annual mean flow (e.g., available from USGS, MassDEP, or NHDES):	cfs		
Source water 7-day mean low flow with 10-year recurrence interval (7Q10):	cfs		
Volume of total intake water withdrawn and used in facility as a percentage of:			
Source water mean annual flow cfs			
Source water 7Q10 flow cfs			

D. Chemical Additives			
1. Does the facility use or padjustment?	plan to use non-toxic chemicals for pH	□ Yes □ No	
2. Does the facility use or purposes?	plan to use chemicals for anti-freeze	□ Yes □ No	
3. If the answer to D.2 is yes, p	rovide the following for EACH chemical	additive used for anti-freeze:	
Chemical Name and Manufac	turer:		
Maximum Dosage Concentrat	tion Used:	Average Dosage Concentration Used:	
Maximum Concentration in Discharge:  mg/L  Average Concentration in Discharge:  mg/L		Average Concentration in Discharge: mg/L	
Material Safety Data Sheet (M	ISDS) or other toxicity documentation	for each chemical attached? $\square$ Yes $\square$ No	
E. Endangered Species Act			
Appendix 2 to the HYDROGP explains the certification requirements related to threatened and endangered species and designated			
critical habitat. Indicate under which criteria the discharge is eligible for coverage under the HYDROGP:			
1. ESA eligibility for	☐ Criterion A: No endangered or threatened species or critical habitat are in proximity to the		
species under jurisdiction of USFWS discharges or related activities or come in contact with the "action area." See Appendix 2, Part I documentation requirements. Documentation attached?   Yes  No			
			☐ Criterion B: Formal or informal consultation with the USFWS under Section 7 of the ESA
resulted in either a no jeopardy opinion (formal consultation) or a written concurrence by USFWS on			
a finding that the discharges and related activities are "not likely to adversely affect" listed species or			
critical habitat. Has the operator completed consultation with USFWS and attached documentation?			
☐ Yes ☐ No			
	If no, is consultation underway?	Yes   No	
	☐ <b>Criterion C</b> : Using the best scien	ntific and commercial data available, the effect of the discharges	
		and designated critical habitat have been evaluated. Based on	
	_	nade by EPA, or by the operator and affirmed by EPA, that the	

	discharges and related activities will have "no effect" on any federally threatened or endangered
	species or designated critical habitat under the jurisdiction of the USFWS. Has the applicant attached
	documentation of the "no effect" finding? $\square$ Yes $\square$ No
2. ESA eligibility for	Is the facility located on: the Connecticut River between the Massachusetts/Connecticut state line
species under	and Turners Falls, MA; the Taunton River; the Merrimack River between Lawrence, MA and the
jurisdiction of NMFS	Atlantic Ocean; the Piscataqua River including the Salmon Falls and Cocheco Rivers; or a marine
	water?
	□ Yes □ No
	If yes, was the applicant authorized to discharge from the facility under the 2009 HYDROGP?
	☐ Yes ☐ No
	If the discharge is to one of the named rivers above or to a marine water <i>and</i> the facility was not
	previously covered under the 2009 HYDROGP, has there been any previous formal or informal
	consultation with NMFS? $\square$ Yes $\square$ No
	Documentation of consultation attached?   Yes   No
	Documentation of consultation attached:   1 es   No
F. National Historic Proper	ties Act Eligibility
	on the discharge(s) is eligible for covered under the HYDROGP:
☐ Criterion A: No his	storic properties are present.
☐ Criterion B: Histor	ic properties are present. The discharges and related activities do not have the potential to impact
historic properties.	
☐ Criterion C: Histor	ric properties are present. The discharges and related activities have the potential to impact or adversely
impact historic prop	perties.
2. Has the applicant attached s	supporting documentation for NHPA eligibility described in Appendix 3, Part C of the HYDROGP?
	fter reviewing the National Park Service's National Register Database, there are no historic properties present.
·	

2 D	OCC T.:11.11			
3. Does supporting documentation include a written agreement from the State Historic Preservation Officer, Tribal Historic Preservation				
Officer, or other tribal representative that outlines measures the operation will carry out to mitigate or prevent any adverse				
effects on historic properties?   Yes  No				
G. Supplemental Information				
Please provide any supplemental information, including antidegradation review information appli	cable to new or increased			
discharges. Attach any certifications required by the HYDROGP. Supplemental information attac	hed? □ Yes □ No			
H. Cianatana Daniinana anta				
<ul> <li>H. Signature Requirements</li> <li>The NOI must be signed by the operator in accordance with the signatory requirements of 40 C.F.I</li> </ul>	D & 122.22 including the following			
certification:	R. § 122.22, including the following			
Contineation.				
I certify under penalty of law that no chemical additives are used in the discharges to be authorized.	orized under this General			
,, , ,	Permit except for those used for pH adjustment or anti-freeze purposes and that this document and all attachments were			
prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel				
properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the				
system, or those directly responsible for gathering the information, I certify that the information submitted is, to the best of				
my knowledge and belief, true, accurate, and complete. I certify that I am aware that there are significant penalties for				
submitting false information, including the possibility of fine and imprisonment for knowing violations.				
2. Notification provided to the appropriate State, including a copy of this NOI, if required?	☐ Yes ☐ No

#### FISH AND WILDLIFE SERVICE

New England Ecological Services Field Office 70 Commercial Street, Suite 300 Concord, NH 03301-5094 Phone: (603) 223-2541 Fax: (603) 223-0104

In Reply Refer To: April 17, 2023

Project code: 2023-0069976

Project Name: Franklin Power LLC/ Riverbend

Federal Action Agency (if applicable):

**Subject:** Record of project representative's no effect determination for 'Franklin Power LLC/

Riverbend'

Dear Erica Liguori:

This letter records your determination using the Information for Planning and Consultation (IPaC) system provided to the U.S. Fish and Wildlife Service (Service) on April 17, 2023, for 'Franklin Power LLC/ Riverbend' (here forward, Project). This project has been assigned Project Code 2023-0069976 and all future correspondence should clearly reference this number. **Please carefully review this letter.** 

### **Ensuring Accurate Determinations When Using IPaC**

The Service developed the IPaC system and associated species' determination keys in accordance with the Endangered Species Act of 1973 (ESA; 87 Stat. 884, as amended; 16 U.S.C. 1531 et seq.) and based on a standing analysis. All information submitted by the Project proponent into the IPaC must accurately represent the full scope and details of the Project. Failure to accurately represent or implement the Project as detailed in IPaC or the Northern Long-eared Bat Rangewide Determination Key (Dkey), invalidates this letter.

## **Determination for the Northern Long-Eared Bat**

Based upon your IPaC submission and a standing analysis, your project has reached the determination of "No Effect" on the northern long-eared bat. To make a no effect determination, the full scope of the proposed project implementation (action) should not have any effects (either positive or negative), to a federally listed species or designated critical habitat. Effects of the action are all consequences to listed species or critical habitat that are caused by the proposed action, including the consequences of other activities that are caused by the proposed action. A consequence is caused by the proposed action if it would not occur but for the proposed action and it is reasonably certain to occur. Effects of the action may occur later in time and may

include consequences occurring outside the immediate area involved in the action. (See § 402.17).

Under Section 7 of the ESA, if a federal action agency makes a no effect determination, no consultation with the Service is required (ESA §7). If a proposed Federal action may affect a listed species or designated critical habitat, formal consultation is required except when the Service concurs, in writing, that a proposed action "is not likely to adversely affect" listed species or designated critical habitat [50 CFR §402.02, 50 CFR§402.13].

#### Other Species and Critical Habitat that May be Present in the Action Area

The IPaC-assisted determination for the northern long-eared bat does not apply to the following ESA-protected species and/or critical habitat that also may occur in your Action area:

Monarch Butterfly Danaus plexippus Candidate

You may coordinate with our Office to determine whether the Action may affect the animal species listed above and, if so, how they may be affected.

#### **Next Steps**

Based upon your IPaC submission, your project has reached the determination of "No Effect" on the northern long-eared bat. If there are no updates on listed species, no further consultation/ coordination for this project is required with respect to the northern long-eared bat. However, the Service recommends that project proponents re-evaluate the Project in IPaC if: 1) the scope, timing, duration, or location of the Project changes (includes any project changes or amendments); 2) new information reveals the Project may impact (positively or negatively) federally listed species or designated critical habitat; or 3) a new species is listed, or critical habitat designated. If any of the above conditions occurs, additional coordination with the Service should take place to ensure compliance with the Act.

If you have any questions regarding this letter or need further assistance, please contact the New England Ecological Services Field Office and reference Project Code 2023-0069976 associated with this Project.

## **Action Description**

You provided to IPaC the following name and description for the subject Action.

#### 1. Name

Franklin Power LLC/ Riverbend

#### 2. Description

The following description was provided for the project 'Franklin Power LLC/ Riverbend':

1936 kW Hydroelectric Generation located on the Winnipesaukee River, NH. Applying for renewal of HYDROGP.

The approximate location of the project can be viewed in Google Maps: <a href="https://www.google.com/maps/@43.4461854,-71.6444432720597,14z">https://www.google.com/maps/@43.4461854,-71.6444432720597,14z</a>

# **DETERMINATION KEY RESULT**

Based on the information you provided, you have determined that the Proposed Action will have no effect on the Endangered northern long-eared bat (Myotis septentrionalis). Therefore, no consultation with the U.S. Fish and Wildlife Service pursuant to Section 7(a)(2) of the Endangered Species Act of 1973 (87 Stat. 884, as amended 16 U.S.C. 1531 *et seq*.) is required for those species.

# **QUALIFICATION INTERVIEW**

1. Does the proposed project include, or is it reasonably certain to cause, intentional take of the northern long-eared bat or any other listed species?

**Note:** Intentional take is defined as take that is the intended result of a project. Intentional take could refer to research, direct species management, surveys, and/or studies that include intentional handling/encountering, harassment, collection, or capturing of any individual of a federally listed threatened, endangered or proposed species?

No

2. The proposed action does not intersect an area where the northern long-eared bat is likely to occur, based on the information available to U.S. Fish and Wildlife Service as of the most recent update of this key. If you have data that indicates that northern long-eared bats are likely to be present in the action area, answer "NO" and continue through the key.

Do you want to make a no effect determination? *Yes*
