

Dear Administrator Curt Spalding, Feb. 20, 2012

Thank you for protecting NH's water from dirty coal polluters like PSCo's NH's Merrimack Station coal plant in Bow. It has been destroying the fish & other living creatures in the Merrimack River for many decades. The Merrimack River provides drinking water to communities throughout NH & MA. I support your New Draft Nat'l Pollutant Discharge Elimination System permit for the Merrimack (River) Station coal-fired plant in Bow.

It is past time they installed modern, efficient technologies to reduce water use & stop killing so many fish.

I love to kayak the Merrimack River as well!

Sincerely,

Judi Lindsey
