

Merrimack Station

AR#1078

Allan Palmer 1-31-14

1^o - primary
evaporator } significant
 } water
 } → shipped.

run crystallizers → small amount of
H₂O

salt cake press → gets spray
wash water.

1 gpm.

and other waste streams,
maybe certain amount of
Stream B.

Crystallizer wastewater → blowdown
(kinda of like cleaning)

4,000 gallons/day

⊕ sometimes goes back to beginning of
process. but have to on occasion
Not a lined yet. blowdown.

only so many holding tanks
