MERRIMACK RIVER
ANADROMOUS FISHERIES INVESTIGATIONS:
ANNUAL REPORT FOR 1976

Prepared for
PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE
Manchester, New Hampshire

by
NORMANDEAU ASSOCIATES, INC.
Bedford, New Hampshire

May 1976

STUDY COLLABORATORS

PROJECT DIRECTOR:

Christopher J. Schmitt, Fisheries Biologist
Normandeau Associates, Inc.
Nashua Road
Bedford, NH 03102

HYDROGRAPHIC FIELD STUDIES

John D. Monk, Hydrographer
Normandeau Associates, Inc.

NUMERICAL SIMULATION:

Ronnal P. Reichard, Fluid Dynamicist
Department of Mechanical Engineering
University of New Hampshire
Durham, NH 03824

EGG TRANSPORT STUDIES:

W. Frank Bohlen, Assistant Professor of Oceanography
Marine Sciences Institute
University of Connecticut at Avery Point
Groton, CT 06340

and

Christopher J. Schmitt
Normandeau Associates, Inc.

BIOLOGICAL STUDIES:

Christopher J. Schmitt
Normandeau Associates, Inc.

TABLE OF CONTENTS

	PAGE
I. INTRODUCTION.	1
A. RESTORATION PROGRAMS	1
1. American Shad	1
2. Atlantic Salmon	2
B. HOOKSETT POND AS HABITAT FOR ANADROMOUS FISHES	3
1. Atlantic Salmon	3
2. American Shad	4
C. AMERICAN SHAD AND POWER PLANTS	5
II. STUDIES CONDUCTED DURING 1975	8
A. GENERAL APPROACH	8
B. HYDROGRAPHIC INVESTIGATIONS.	9
1. Hydrographic Field Studies.	9
a. Methods of Study	9
b. Results.	13
2. Numerical Simulation.	16
a. Methods of Study	16
b. Model Application.	32
C. BIOLOGICAL INVESTIGATIONS.	32
1. Shad Egg Transport and Fall Velocity Studies.	33
a. Methods of Study	33
b. Results.	36

	PAGE
2. Field Bioassay.	40
a. Methods of Study	40
b. Results.	46
3. Laboratory Bioassay	65
a. Methods of Study	65
b. Results.	69
III. SUMMARY AND DISCUSSION OF RESULTS TO DATE	78
A. HYDROGRAPHIC INVESTIGATIONS.	78
B. BIOLOGICAL INVESTIGATIONS.	78
IV. LITERATURE CITED.	82
APPENDIX A.	86
APPENDIX B.	150

LIST OF FIGURES

	PAGE
1. Hydrographic transect and station locations. Merrimack River Anadromous Fisheries Studies, 1975.	10
2. Mooring system for continuous temperature recorders. Merrimack River Anadromous Fisheries Studies, 1975.	12
3. Cross-sectional temperature profile at related transects, August 8, 1975. Merrimack River Anadromous Fisheries Studies, 1975	19
4. Cross sectional temperature profile at related transects, August 14, 1975. Merrimack River Anadromous Fisheries Studies, 1975	20
5. Cross sectional temperature profile at related transects, August 15, 1975. Merrimack River Anadromous Fisheries Studies, 1975	21
6. Cross sectional temperature profile at related transects, September 4, 1975. Merrimack River Anadromous Fisheries Studies, 1975	22
7. Cross sectional temperature profile at related transects, September 5, 1975. Merrimack River Anadromous Fisheries Studies, 1975	23
8. Cross sectional temperature profile at related transects, October 2, 1975. Merrimack River Anadromous Fisheries Studies, 1975	24
9. Cross sectional temperature profile at related transects, October 3, 1975. Merrimack River Anadromous Fisheries Studies, 1975	25
10. Cross sectional temperature profile at related transects, October 24, 1975. Merrimack River Anadromous Fisheries Studies, 1975	26
11. Cross sectional temperature profile at related transects, October 30, 1975. Merrimack River Anadromous Fisheries Studies, 1975	27

	PAGE
12. Cross sectional temperature profile at related transects, November 7, 1975. Merrimack River Anadromous Fisheries Studies, 1975	28
13. Cross sectional temperature profile at related transects, November 20, 1975. Merrimack River Anadromous Fisheries Studies, 1975	29
14. Cross sectional temperature profile at related transects, December 3, 1975. Merrimack River Anadromous Fisheries Studies, 1975	30
15. Turbulence flume outline drawing. Merrimack River Anadromous Fisheries Studies, 1975.	35
16. Shad egg fall velocity vs. age. Merrimack River Anadromous Fisheries Studies, 1975.	37
17. Map of Hooksett Pond showing powerplant and related features and numbered sampling stations. Merrimack River Anadromous Fisheries Studies, 1975.	41
18. Temperatures experienced by shad eggs during drifting phase of field bioassay series No. 1. Merrimack River Anadromous Fisheries Studies, 1975.	47
19a. Daily temperature minima, maxima, means, and standard deviations at Station N-10 between June 4 and June 26, 1975. Merrimack River Anadromous Fisheries Studies, 1975 .	58
19b. Daily temperature minima, maxima, means, and standard deviations at Station S-4 between June 4 and 24, 1975. Merrimack River Anadromous Fisheries Studies, 1975.	59
19c. Daily temperature minima, maxima, means, and standard deviations at Station S-17 between June 4 and 24, 1975. Merrimack River Anadromous Fisheries Studies, 1975.	60
20. Range of daily discharge as measured at Garvin's Falls (cfs). (Hourly readings until 8/72; range of 6 hours means from 8/72 through 1975). Merrimack River Anadromous Fisheries Studies, 1975	61
21. Temperatures experienced by shad eggs during drifting phase of field bioassay series No. 2 and No. 3. Merrimack River Anadromous Fisheries Studies, 1975.	64

22.	Cumulative mortality/survivorship, Test Series No. 1 (Probit vs. time). Merrimack River Anadromous Fisheries Studies, 1975	70
23.	Cumulative mortality/survivorship, Test Series No. 2 (Probit vs. time). Merrimack River Anadromous Fisheries Studies, 1975	71
24.	Cumulative mortality/survivorship, Test Series No. 3 and No. 4 (Probit vs. time). Merrimack River Anadromous Fisheries Studies, 1975.	72
25a.	Survivorship vs. temperature change (probit vs. t) for young larvae. Merrimack River Anadromous Fisheries Studies, 1975	74
25b.	Survivorship vs. temperature change (probit vs. t) for old larvae. Merrimack River Anadromous Fisheries Studies, 1975	75
26a.	Survivorship vs. maximum temperature (probit vs. temperature) for young larvae. Merrimack River Anadromous Fisheries Studies, 1975.	76
26b.	Survivorship vs. maximum temperature (probit vs. temperature) for old larvae. Merrimack River Anadromous Fisheries Studies, 1975.	77

LIST OF TABLES

	PAGE
1. RIVER DISCHARGE IN CUBIC FEET PER SECOND AS MEASURED AT GARVIN'S FALLS DAM DURING DAYS ON WHICH SURVEYS WERE CONDUCTED. MERRIMACK RIVER ANADROMOUS FISHERIES STUDIES, 1975.	14
2. AVERAGE SPEED IN KNOTS AT SURFACE AND BOTTOM ALONG ALL TRANSECTS FOR SELECTED DATES (1 kt = 51.47 cm/sec). MERRIMACK RIVER ANADROMOUS FISHERIES STUDIES, 1975	15
3. CROSS SECTIONAL TEMPERATURES OF TRANSECTS WHICH WERE ISOTHERMAL PART OF THE TIME. MERRIMACK RIVER ANADROMOUS FISHERIES STUDIES, 1975.	17
4. CROSS SECTIONAL TEMPERATURES OF TRANSECTS WHICH WERE ISOTHERMAL THROUGHOUT THE STUDY. MERRIMACK RIVER ANADROMOUS FISHERIES STUDIES, 1975	18
5 a - j. ANOVA AND MULTIPLE CLASSIFICATION ANALYSIS FOR FIELD BIOASSAY, SERIES #1. MERRIMACK RIVER ANADROMOUS FISHERIES STUDIES, 1975.	48-57
6. TABLE OF MEANS, DEVIATIONS, AND COEFFICIENTS OF VARIATION, FIELD BIOASSAY SERIES #3 AND #4. MERRIMACK RIVER ANADROMOUS FISHERIES STUDIES, 1975	63
