## Tel S. Gidore

- I agreed to send <sup>a paper w/ limits</sup> a Draft for Discussion
- He said they'd send us something Monday or Tuesday of next week
- I told them we were interested in hearing about their flow limit approach (in lieu of capacity factor limit) we were not averse to the idea but wanted to see how they propose to do it
- I told them we'd also had a new number for  $\Delta T$  when Ambient is at or over a Temp limit (~~is~~  $\Delta T \neq 0$ )
- Paper Monday week of May 13
