

message from Doug Smithwood 603-595-1371  
USFWS - works w/ Joe McKean

2

adult herring - dam controlled let down,  
stay in impoundment for quite a while  
flow dependent. But if they can get  
out they will

atkinson - 2 pulses. - early at July  
w/ heavy flows  
most by dam releases - 1st 2 weeks  
of Oct - some Schroy second dam in  
Sept - ready to move.

weather of  
info

~~Fin~~ - d

shed plan

DES - ~~is~~ impoundment - dam releases.  
- high flow conditions - herring retained by impoundments

Suncoco especially

Northwood Lake  
monitoring at mouth of  
Suncoco R.

Curt Mooney from PSNH.

foraging - dimpling on water. - more dispersed  
migrating - clustered. - not sure  
they forage while migrating

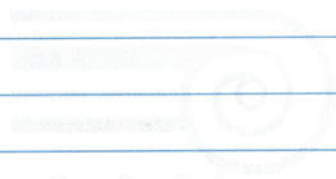

@ Pembroke Hydro - in town  
power canal 1/3 mile long.

- Salmon - move quickly when not impeded.
- when in head pond, not sure if they forage. there is some grow-out. →

Stratified in Sluice way

{ aluminos - on top  
blue bentonite - closer to bottom temp.

depends on availability -
