Subject  
Cooling Tower Analysis

Allan,

What follows are the main factors EPA will direct PSNH to consider for the cooling tower analysis.

"EPA requires Public Service of New Hampshire within sixty days of receipt of this letter to provide the following information:

- i.) The age of the equipment and facilities involved;
- ii.) The process employed;
- iii.) The engineering aspects of the application of various types of control techniques;
- iv.) Process changes;
- v.) The cost of achieving such effluent reductions; and
- vi.) Non-water quality environmental impact (including energy requirements)."

I want to discuss, please call.

John
