Allan,

Can you satisfy Jeff's request.

John "308 Letter" King

Subject RE: Scrubber Effluent Limitation Meeting

John, if we can get info on what's in the discharge prior to the meeting we can start looking at antidegradation requirements, impairment status, estimating limits, etc.

Thanks, Jeff

Subject: Scrubber Effluent Limitation Meeting

Sterg,

It would be better for Allan and his group if we started at 10:00 ... I am not adverse to that.

Allan also ask whether the thrust of the meeting will be discussing limits, treatment or both. I request your input on the agenda of the meeting. My thoughts are that as representatives of the regulatory agencies our emphasis is deriving effluent limits that are protective of the water quality standards of New Hampshire. I recommend the meeting, therefore, concentrate on the parameters contained in the scrubbers effluent and what effluent limits PSNH can expect.

John
