You remember that all of the temperature data is submitted in annual reports to EPA, and don't forget that there's a lot of good information in our PIC and the 308 Report!

Where the heck did that temperature excel file come from?

Re: Requested Information

Allan,

I am having trouble with the inquiries to ICIS (formerly PCS). I have been discussing it with the data base manager. I hope I now have better access to all Merrimack Station's data. I will discuss some data, statistics, etc. with you next week.

Do have a great Thanksgiving.

John

Re: Requested Information

Isn't all the 001 and 002 data available from your PCS people?

We discussed that the 001 and 002 flows are directly linked to the hours of pump operation, right? If you have the flows, the hours are a direct calculation.

We'll need to talk next week, Happy Thanksgiving JPK.

Requested Information

Allan,

I need the sampling results for Outfalls 001 and 002 from January 2005 to date. The data only consists of flow and chlorine measurements. Why am I asking for the data from you? I am having difficulty extracting that information from our electronic files.

Also, operating times for the four cooling water pumps. It can either be data from January 2005, or PSNH stated average hours of pump operation per year. If Merrimack Station has usage rates for those pumps that would also be appreciated.

Thanks, John
