John & Sharon: Last year we agreed to waive the low flow impingment monitoring permit requirement at Merrimack Station in lieu of the Normandeau Associates 316(b) monitoring program. NAI will be continuing the enhanced 316(b) program for a second year so we'd like to renew the waiver for one more season. Given the river flows and this weather, I question if we would have to initiate the low flow program this summer anyhow. Please let me know your thoughts. Thanks, Allan.
