

Thank you for your help in framing our discussion for Monday. Your outline is right in line with our thoughts. As you know, the most critical issue to be addressed in the meeting is the impact--both environmental and economic--of any delays in getting this project on-line in concert with our current schedule. So, most importantly, we would like to discuss with your team various options to facilitate this process.

Subject: Desired outcomes for meeting on Monday

---

gentlemen,  
below is an attempt to draft some desired outcomes for our meeting -  
some of which i picked up from my folks who have been talking with  
yours.  
let me know if i'm wide of the mark or something critical is missing.  
if we're in agreement on what we want to accomplish, the agenda should  
flow naturally from it.  
i am not in the office on friday but will have some blackberry time  
along the way.  
thanks  
stephen

Please only print if necessary

Desired Outcomes

- Understanding of the FGD project (technology, schedules, drivers, benefits)
- Understanding of what EPA needs to make a BAT determination for the FGD project
- Understanding of why "zero discharge" is not "available" (in BAT context)
- Understanding of EPA's intended approach to permitting the facility
- Agreement on next steps
