Subject: Comments on the proposed NPDES Permit No. NH0001465 for the Merrimack Station
Date: 02/28/2012 02:38 PM

Attachments: [PSNH Merrimack Comments Duke Energy.pdf](#)

Mr. John King,

Please find attached comments from Duke Energy on the proposed NPDES Permit (permit number NH0001465) for the Public Service of New Hampshire (PSNH) Merrimack Station in Bow, New Hampshire. Duke Energy was compelled to comment on the proposed permit, since many of the proposed limits were based on EPA's analysis of data from two of Duke Energy's power plants, the Allen Steam Station and the Belews Creek Steam Station .

A hard copy of the attached comments will be sent today (February 28, 2011) via UPS for overnight delivery.

If you have any questions or would like to discuss our comments further, please do not hesitate to contact us.

Thank you for taking the time to review and consider our comments,
