---

"I strongly urge the EPA to move forward with its plan to require a water-cooling system for the Merrimack coal plant. The impacts on Merrimack River ecology over the past 50+ years have been dreadful. The fish kills and water usage are the most visible and egregious. As someone who lives near in the rivershed and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant."

Debra Simes  
Acton, MA 01720

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant."

Dorothy Hewitt  
Salem, NH 03079

---

"The Merrimack coal plant should not be allowed to discharge hot water that harms wildlife. I urge you to require the construction of a closed-cycle system."

David Weingart  
Barrington, NH 03825

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant."

“Why have we not been able to generate more support for a reasonable cooling of water than dumping it back into the Merrimack? After almost 50 years of operation it is well past the time to adopt newer technology. The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Hunter Farnham  
Exeter, NH 03833

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. The continual pollution of our eco-system is unacceptable. People expect the EPA to be given the tools and the latitude to protect the public and wildlife that depend on clean water, not to bend over to big business – period! We the people are sick and tired of lax laws, loopholes, and outright bribery by big business in the undermining of safety and well being. Enough is enough.”

Nancy Hatfield  
North Chelmsford, MA 01863

---

“I can walk to the Merrimack River in five minutes. I see it everyday on my way to and from work. Where I live, it flows gently by. I would like to see you push PSNY to step up and do a great thing for all of us who live near the river and for all the wildlife that it could once again support. The fish kills and water usage associated with the Merrimack coal plant are unacceptable and implementing a closed-cycle cooling system there would be a way for PSNY to give back to the community and to the earth. ”

Bradley Eardley  
Groveland, MA 01834

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Mike Raymond  
Nashua, NH 03060

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Neil Werfel  
Seabrook, NH 03874

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Barbara Lambert  
Holderness, NH 03245

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives in southern New Hampshire and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Margaret Schoene  
Exeter, NH 03833

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. NH used to be known as a great state for hunting and fishing. Is Public Service serving the public by warming the water and killing the fish? I think not."

Dwight Haynes  
Concord,, NH 03301

---

---

"As a family that lives downstream of the Merrimack Station and cares about the local environment, It is imperative that hazardous waste from the scrubbers be kept out of both the air and the Merrimack river. It makes no sense to clean the air and continue an open cycle cooling system. I also have been told that the new hardware needed for a closed cycle cooling system is manufactured in the USA, contributing to our economy. In my opinion, the jobs created by this alone is sufficient justification to make it happen. I urge you to continue the decades of well-done, fruitful and technology-enhancing regulation work the EPA has successfully completed. Please require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant as part of implementing a wet scrubber. George & Denise Paquin 2 Pendleton Road Chelmsford, MA 01824 "

George Paquin  
Chelmsford, MA 01824

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Elizabeth Lavallee  
Hampton, NH 03842

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Deborah Thurber  
Jaffrey, NH 03452

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Linda Baker  
Keene, NH 03431

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives in a bend between the Merrimack and one of its tributaries, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant."

Robin Shore  
Nashua, NH 03064

---

---

"As a 30-year citizen of New Hampshire, I am proud of the quality of New Hampshire's environment. To me it is the center of what New Hampshire represents. And I am proud of the clear thinking and public service of New Hampshire people. I have also been proud of my electric utility, Public Service of NH, so I was shocked to hear that they are not using a closed-cycle cooling system at their Merrimack coal plant. The fish kills and water usage associated with the Merrimack coal plant are unacceptable. I urge you to continue to require Public Service of New Hampshire to install the closed-cycle cooling system. As a customer of Public Service it may cost me more, but it is worth it. And it will also benefit Public Service in the long run to have the newer and cleaner technology in that plant."

Judith Reardon  
Chocorua, NH 03817

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Karen Booker  
Contoocook, NH 03229

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Kenneth Ziebell  
Woburn, MA 01801

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. This seems a smart strategy and is certainly do-able. If you kill all the fish...what happens to the other parts of that eco-system. Do the right thing. "

Debbie Barr  
Concord, MA 01742

---

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Jessie Stepanian  
Methuen, MA 01844

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Paul Eichten  
Lowell, MA 01851

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Richard Turgeon  
Claremont, NH 03743

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Warren Flewellen  
Chelmsford, MA 01824

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Peter Little  
Amesbury, MA 01913

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Annette Dubois  
Hudson, NH 03051

---

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Peter Joslin  
Raymond, NH 03077

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Patricia Martin  
Rindge, NH 03461

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Sue Kennedy  
Acton, MA 01720

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. As a college student, in the late 1970’s, I worked on a project for a power plant in Fall River which was trying to find ways to mitigate the environmental damage done due to heated discharge. This is not a new problem. There were solutions identified in the 1970’s and I’m certain that there are viable solutions now. Thank-you for working to implement them! ”

Linda Ruiz  
Groveland, MA 01834

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Karlene Embler  
Hancock, NH 03449

---

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. This is the system the EPA has proposed. Please follow the recommendation of these experts. ”

Susan Gates  
Chelmsford, MA 01824

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

---

"As a New Hampshire citizen and customer of PSNH who cares about the local environment, I urge you to require PSNH to implement a closed-cycle cooling system at its Merrimack coal plant. It's important to anyone who understands that an imbalance in a single population (in this case, the fresh-water fish) upsets the ecology of the entire river. If we have the technology to cool the discharge into the Merrimack, then we should be doing that now. "

Olivia Morrissette  
Warren, NH 03279

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Andrew Kasprzak  
Andover, MA 01810

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Elizabeth Klingler  
Elkins, NH 03233

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Tom Hall  
Nottingham, NH 03290

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Eric Arn  
Milford, NH 03055

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives in New Hampshire and cares about the local environments, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. The river belongs to more than just the coal plant, let's aim for the 99 percent, and lower that temperature. "

Jan Dunn  
Stratham, NH 03885

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Robert Driscoll  
West Chesterfield, NH 03466

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Jane Brickett  
Lancaster, NH 03584

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Robert Battersby  
Center Conway, NH 03813

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Janette Lozada  
Meredith, NH 03255

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Brandon Hobart  
Concord, NH 03303

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. The coal plant also hurts the people of New Hampshire, Why not clean air. Clean it up!"

Katheryn Holmes  
Newbury, NH 03255

---

"I am a resident of New Hampshire. This plant has been and continues to harm the environment both in Air Quality and now Water Quality. My electricity is high enough - but \$1.00 more is fine with me to make sure we don't mess things up more. Actually we need to immediately find alternatives to this plant and shut it down. Newbury, NH The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Steve & Sue Russell  
Newbury, NH 03255

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Tayva Young  
Derry, NH 03038

---

"The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. "

Tom Vachon

As someone who lives near the Merrimack river and cares about the local environment, I urge you to require Public Service of New Hampshire to shut down this plant! Merrimack Station is the state’s single biggest polluter, and the 41 year old plant is as big a waste of money as Seabrook’s Nuclear Power Plant has been (after promising power “too cheap to meter”, Seabrook cost so much it forced PSNH into bankruptcy, for which the ratepayers of NH are still paying!!!). It’s time PSNH closed this plant, and bought cheaper power that doesn’t rely on Venezuelan coal from the NE market – Unilil and National Grid’s commercial rates are low, so it would be cheaper to buy electricity from them than it would be to run the plant WITHOUT the upgrades it needs, which are going to add even MORE to our electric bills!”</p> <p>Jennifer Spaziani Amherst, NH 03031</p>	<p>“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives on the Contoocook River and cares deeply about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. Maybe someday salmon will come back and spawn here in Peterborough. Richard Estes 5 Granite St. Peterborough, NH 03458 ”</p> <p>Richard Estes Peterborough, NH 03458</p>

---

“The fish population is essential to the food chain and we should urge to coal plant to do what they can to help out the fish as well as their impact on the environment. A 96% decline in the number of fish in the Merrimack River over a 50 year time span is quite disheartening! Although the use of coal is still seen as one type of energy that many hope to soon minimize in our communities, at the moment eradicating its use is not 100% possible.....YET! Safeguards and very innovative practices are available to make coal a tad bit “greener” and less detrimental to the the many living creatures/things, water, air, soil and overall community the coal emissions impact PLEASE, I urge you to consider thoroughly and implement the water cooling system to do your part for the fish, wildlife, environment, your company and the overall community. The act and difference will be appreciate by those of us who live around here, the environment and especially the fish population. Thank you!”

Jennifer Craffey  
Nashua, NH 03060

<p>“Dear EPA, I remember learning this topic when I was in college 40 years ago. I learned about how water temperature is affected by pollution from factories, nuclear power plants, and where I grew up, oil refineries. These temperatures kill fish, as well as microfauna and microflora that are essential to all life in ways we don’t even begin to understand. I can’t believe that we have not made progress on this topic! The fish kills and water usage associated with the Merrimack coal plant are unacceptable. I live in Gilford, NH I fish, swim, and canoe on the Merrimack. I care deeply about the environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”</p> <p>Janet Robertson Gilford, NH 03249</p>	<p>“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. “The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Daniel Romero  
Haverhill, MA 01830

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. The EPA’s job is to protect the environment. So do it. ”

Thomas Diehl  
Alexandria, NH 03222

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Robert Burns  
Keene, NH 03431

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Tom Gloude-mans  
Hancock, NH 03449

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who has lived near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Philip Polhemua  
Meredith, NH 03253

---

“To not require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant is irresponsible. The fish kills documented at this location should not be an acceptable by-product of the operation of the plant and considering the freshwater supply crisis happening world-wide, the wasteful single use cooling method associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, it is imperative that effective improvements such as the closed-cycle cooling be implemented.”

Christian Roop  
Georgetown, MA 01833

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Lisa Millimet  
Wilton, NH 03086

---

“We don’t have to choose between power and wildlife. Cool the water down! Tom Rush”

Jane Davis  
Manchester, NH 03104

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Sean Johnson  
Milford, NH 03055

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Deborah Crane  
Littleton, MA 01460

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant, or better yet find a more environmentally friendly means of generating power altogether and stop burning coal. ”

Greg Dwyer  
Weare, NH 03281

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Roger Bruneau  
Goffstown, NH 03045

---

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Igor Givotovsky  
Amesbury, MA 01913

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Barbara Herber  
Gilford, NH 03249

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

John Concannon  
Lynnfield, MA 01940

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. I vividly remember how much fun I had rowing on it as a child on a school trip and I want other generations to experience that same joy. It won’t be very much fun for kids to go rowing in a river full of dead fish or in a dead zone caused by a collapsed ecosystem. Please stick to your guns and make sure the power plant implements the kind of cooling system that doesn’t kill fish. Thank you! Jonathan Williams ”

Jonathan Williams  
Carlisle, MA 01741

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Daniel Snodgrass  
Manchester, NH 03101

---

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Andrew Dunbar  
Peterborough, NH 03458

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Laurence Smith  
North Andover, MA 01845

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Elaine Kellerman  
Concord, NH 03301

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Barbara Shade  
Boxford, MA 01921

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Susan Douglas  
Ipswich, MA 01938

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Laurie Nehring  
Ayer, MA 01432

---

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. I, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. I have witnessed first hand what indiscriminate and poorly thought out water usage problems can do the the fragile aquatic environment. When we are able to correct these problems, we have an obligation to do so.”

Elaine Hashem  
Barrington, NH 03825

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Marion Chamberlin  
Deering, NH 03244

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Matthew Dick  
North Andover, MA 01845

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Amy Zimmerman  
Mirror Lake, NH 03853

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Carol Budro  
Amherst, NH 03031

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

James Burns  
Chelmsford, MA 01824

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

William Carman  
Sandown, NH 03873

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. The environment is a precious resource; if we are not mindful we will lose all that we truly value – our lives and health as well as those of the fish. Please take action on this.”

Barbara Houston  
Northwood, NH 03261

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Haroula Tsolakidis  
Manchester, NH 03102

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Sharon Adler  
New Boston, NH 03070

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. Some solutions are difficult. This one is simple with tremendous benefits to fish and wildlife. Please require PSNH to do the right thing. Thank you.”

Theresa Matregrano  
Rumney, NH 03266

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. It is extremely wasteful to flush the hot water into the river, that energy should be used elsewhere. ”

Karen Purcell  
Londonderry, NH 03053

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Cheryl Major  
Westford, MA 01886

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Nancy Seager  
Londonderry, NH 03053

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Elizabeth Patten  
Chichester, NH 03258

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

---

“The Clean Water Act has done a nice job returning the Merrimack River and others to a viable ecosystem. This river was practically an open sewer in the 1960’s and early 1970’s. In addition, the states of New Hampshire and Massachusetts have devoted resources toward restoring the salmon population. We need to do all we can to protect and further restore this valuable resource. Canned message to which I agree follows. The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant.”

John Bogart  
Litchfield, NH 03052

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant.”

Julia Ryan  
Hudson, NH 03051

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives in a downstream state and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. This is feasible; it is being done in Massachusetts to save Narragansett Bay. Do the same in NH. Sincerely, Barbara Allan, Lexington, MA ”

Barbara Allan  
Lexington, MA 02420

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Marie Day  
Hudson, NH 03051

---

“The fish kills in the Merrimack River due to heated water being discharged by the Merrimack coal plant are unacceptable, especially after years of effort to clean up the river. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Michael Bleiweiss  
Methuen, MA 01844

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Seth Penna  
Ayer, MA 01432

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Suzette Winchester  
Wolfeboro, NH 03894

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Fred Sladen  
New London, NH 03257

---

“I live near the Merrimack river, and am glad to see the EPA proposing to make PSNH clean up its act, and stop releasing hot water which is killing off fish. Please follow through.”

Laura Pearson  
Londonderry, NH 03053

---

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. When technology exists to better a situation, there is no excuse to damage our air, water, land or inhabitants. As someone who cares about the environment, I STRONGLY URGE YOU to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Marilyn Britton  
Peterborough, NH 03458

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Joan Kaufman  
Bedford, MA 01730

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Ruth O’Neal  
Effingham, NH 03882

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Craig Webb  
Hillsboro, NH 03244

---

“How can this available technology NOT make sense to implement? I’m sure PSNH, as a local company, cares about it’s neighbors & communities....Not just in proximity to the Merrimack river, but neighbors and communities of its employees in neighborhoods across our state! PSNH executives should try looking their neighbors in the eye and answer the question honestly about why they don’t care enough about them or the wildlife to deploy this change. Would the bottom line be as important then? The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Mary Albina  
Milford, NH 03055

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Emily Morse  
Penacook, NH 03303

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Venice Wong  
Allenstown, NH 03275

---

“I read the article briefly, that I got in my e-mail, and I don't like what I saw, you have no right to put stuff in the river like that, killing fish is wrong, they two are God's creatures, and we could have some decent freshwater fish, We need to stop what's been going on. I'm not happy with what's going on. I'm a resident of Lowell Ma, which is a city that the Merrimack river runs through, Stop the contamination, and if I have to comment again in the future. I will. Nobody gets away with this. I am speaking my mind and I want change. I support this petition.”

Christine Scullion  
Lowell, MA 01852

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Jenn Fields  
Nashua, NH 03060

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

David Weed  
Franconia, NH 03580

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. ”

Rebecca Biss  
Concord, NH 03301

---

“The fish kills and water usage associated with the Merrimack coal plant are unacceptable. As someone who lives near the river and cares about the local environment, I urge you to require Public Service of New Hampshire to implement a closed-cycle cooling system at its Merrimack coal plant. It is completely inappropriate that our state's largest electricity provider is not held to appropriate standards concerning the unique and incredible environment we have been blessed with. ”

Jason Robertson  
Strafford, NH 03884

“I grew up near the Merrimack River, and I remember it being too polluted to swim in. Clean up your act!”

Stephanie Behan  
San Francisco, CA 94109

---

“As a former resident that used the Merrimack River for recreation, I urge you to address the fish kill issues created by the coal plant. Our watersheds are our lifeblood, and to let them die, is to let prosperity along their banks die. Sincerely, Hiram E Towle IV 50 Hobbs Road Greenwood, ME 04255 ”

Hiram Towle  
Greenwood, ME 04255
