Subject: Our Conversation Concerning Cooling Water Blow Down

Allan,

I need have a "Copy to File" for our telephone conversation concerning cooling water blow down for the FGD Secondary Wastewater Treatment System (SWWTS). The question I asked was related to Question 30 of EPA's recent 308 to PSNH. Specifically, I inquired whether the SWWTS cooling water blow down had ever been analyzed. Your reply was that particular cooling water system was not longer in operation.

Please provide any required corrections to this record.

Thank you, John
