January 17, 2023

Ms. Lynne Jennings  
Chief, Water Permits Branch  
United States Environmental Protection Agency  
Region 1  
5 Post Office Square Suite 100  
Boston, Massachusetts 02109-3912

Dear Ms. Jennings:

As a follow-up to our meeting on January 12, 2023, I am writing to thank you and your team for the continued dialogue regarding the modification process for our National Pollutant Discharge Elimination System (NPDES) permit for the decommission project at Pilgrim Nuclear Power Station (PNPS) (NPDES Permit No. MA0003557). This meeting was a helpful follow-up to our October 2022 meeting in Boston.

During last week's meeting, we shared our internal draft diagram created to help guide our understanding of the interagency flow path for timing and reviews by pertinent agencies associated with the modification process. We are not requesting any follow-up, approval, or comments on the draft diagram and again thank you for your thoughtful comments during our meeting.

Your continued willingness to provide dialogue around the compliance for future potential discharges has been helpful to our team preparing the data and documents necessary to submit the application for permit modification. Our intention remains to provide the proper documents for the permit modification.

We remain committed to safely decommission PNPS and to resolve this issue in full compliance with our permit and license requirements. We appreciate your interest in the project and ensuring safe, efficient decommissioning coupled with fact-based communication and transparency.

Should you have any questions of us or see a need for a meeting outside of what we have scheduled, please feel free to reach out.
