Re: Authorization to discharge under the Remediation General Permit (RGP) – Authorization # MAG910721, for the Boston Convention & Exhibition Center Phase II site located in Boston, MA

Dear Ms. Mason:

Based on the review of a Notice of Intent (NOI) dated June 26, 2017 submitted by Haley & Aldrich, Inc. for the site referenced above, the U.S. Environmental Protection Agency, Region 1 (EPA) hereby authorizes Charter Contracting Company, as the named operator, to discharge in accordance with the provisions of the RGP from this site via the City of Boston storm sewer system<sup>1</sup> to the Fort Point Channel. The authorization number is listed above. The effective date of coverage is the date of this authorization letter.

Enclosed with this RGP authorization to discharge is a summary of the applicable parameters and effluent limitations for your activity category III, contaminated site dewatering discharge. A dilution factor of zero (i.e., 1:1), was used in calculating effluent limits applicable to the proposed discharge from this site. Please note that this summary does not represent the complete requirements of the RGP. Operators must comply with all of the applicable requirements of the RGP, including influent and effluent monitoring, record keeping, and reporting requirements. Please ensure that sufficiently sensitive test methods are used for all sample analyses conducted for this permit. For the complete general permit, see EPA's RGP website.<sup>2</sup>

This EPA general permit and authorization to discharge will expire on **April 8, 2022**, or upon Notice of Termination (NOT), whichever occurs first. However, in accordance with Part 5.3 of the general permit, your permit coverage will be administratively continued until issuance of a new RGP. Please note that you must submit a NOT within thirty (30) days of the termination of the discharge. You have reported your discharges will terminate in September 2017. Because your discharge is not expected to last twelve (12) months or more, EPA expects you will not to be subject to NetDMR reporting requirements. See

---

<sup>1</sup> The operator is responsible for obtaining permission to discharge to this system, prior to initiating discharges. EPA's authorization to discharge does not convey any such permission.

<sup>2</sup> <http://www.epa.gov/region1/npdes/rgp.html>.

Part 4.6 and 5.2 of the RGP, and Appendix IV, Part 3 for more information regarding reporting requirements.

Please ensure that sufficiently sensitive test methods are used for all sample analyses conducted for this permit. To be considered sufficiently sensitive, test methods must achieve minimum levels for analysis for a given parameter that is no greater than the effluent limitation for that parameter, unless otherwise specified in the RGP for that parameter. Where no effluent limitation applies, EPA has provided the ML required with the enclosed summary. Where a compliance level applies, EPA has provided the compliance level with the enclosed summary.

Thank you in advance for your cooperation in this matter. Please contact Shauna Little at (617) 918-1989 or [little.shauna@epa.gov](mailto:little.shauna@epa.gov), if you have any questions.

Sincerely,

Thelma Murphy, Chief

**Table 2 Notes:**

<sup>1</sup> The following abbreviations are used in Table 2, above:

<sup>a</sup> mg/L = milligrams per liter

<sup>b</sup> µg/L = micrograms per liter

<sup>2</sup> The minimum level (ML) for analysis of ammonia must be less than or equal to 0.1 mg/L.

<sup>3</sup> The ML for analysis of chloride must be less than or equal to 230 mg/L.

<sup>4</sup> The limitation for this parameter is on the basis of total recoverable metal in the water column.

<sup>5</sup> The compliance level for total cyanide is 5.0 µg/L. The ML for analysis of total cyanide must be less than or equal to 5.0 µg/L.

<sup>6</sup> The ML for analysis of group I PAHs must be less than or equal to 0.1 µg/L.

<sup>7</sup> The compliance level for total PCBs is 0.5 µg/L. The ML for analysis of total PCBs must be less than or equal to 0.5 µg/L.
