Mark,

Have updated Schiller Capacity Factor numbers for quarters through 4<sup>th</sup> quarter 2014. Graphs are below by unit.

Units 4 and 6 are coal with residual oil backup. Unit 5 is wood with natural gas back up. As you will see, it's all about the first quarter of the year for the coal units. Qtrs 2 - 4 drop off significantly.

Let me know if you need anything else.

John
