Thanks again Cheri for your help on this so quickly. I have added this requirement to the permit. Also, just to point out that they will likely not have screen wash anymore once they incorporate wedgewire screens as is also required in this new permit. Once that happens, they will not need to continue to send this report.

Best,

Michael Cobb

Subject: Schiller Plant Permit - added language

Mike,

As we discussed on the phone, could you please include under the monitoring section of the Schiller Plant EPA Permit the following to assure that NHF&G's concerns of past issues are not repeated?

A report is to be sent to the NH Fish and Game Department's Marine Division Chief on the impinged lobsters and other biota detected from the screen wash sampling in July and August each year.

If you have questions please feel free to call. Thank you.
