A. Instructions

Important:
When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

Submission of this Notice of Intent constitutes notice that the entity named at item B1. of this form intends to be authorized by the DEP General Permit issued jointly with EPA for stormwater discharges from the small municipal separate storm sewer system (MS4), in the location identified at item B2. of this form. Submission of the Notice of Intent also constitutes notice that the party identified at item B1. has read, understands and meets the eligibility conditions of Part I.B. of the NPDES Small MS4 General Permit, agrees to comply with all applicable terms and conditions of the NPDES Small MS4 General Permit, and understands that continued authorization to discharge is contingent on maintaining eligibility for coverage. **In order to be granted coverage, all information required on BRP WM 08A, including the Stormwater Management Program Summary and Time Frames form, must be completed. Please read the permit and make sure you comply with all requirements, including the requirement to develop and implement a stormwater management program.**

Specify Public Entity

4. Other regulated MS4(s) within municipal boundaries:

State highway

5. Based on the instructions provided in Part I of the NPDES Small MS4 General Permit, have the eligibility criteria for "listed species" and critical habitat been met?

yes pending no

The Ipswich MS4 meets Endangered Species Act eligibility Criterion A (Part 1B.2.E.iii): "No endangered or threatened species or critical habitat are in proximity to the MS4 or the points where authorized discharges reach the receiving waters." Although the federally-threatened piping plover (*Charadrius melodus*) does occur within the town limits, the U.S. Fish & Wildlife Service has determined that the species is unlikely to be adversely affected by the MS4 due to the lack of outfalls adjacent to plover habitat.

Specify Best Management Practice

DPW Director/Utilities
Department Director

Responsible Dept./Person Name

During Year 1, a system will be developed to ensure the staff is informed of alterations to the MS4, that changes are field verified, and maps are updated in a timely manner. Also during Year 1, information from the 1995 Ipswich Coastal Pollution Control Committee (ICPCC) report will be field verified. During Year 2, information from the 1995 ICPCC report will be incorporated into the maps; and information from the Draft (or if available, Final) Phase I Parker Watershed Stormwater Outfall Inventory will be field verified and mapped. During Year 3, information from the Phase II inventory, should it be completed and relevant, will be field verified and mapped. During Year 4, Division of Marine Fisheries data collected over the past five years will be reviewed to determine whether it identifies any previously unmapped outfalls or other elements of the MS4; if it does, those elements of the system will be field located and mapped. During Year 5, any pertinent remaining sources of data will be field verified and mapped. Beginning in Year 2, the Town-wide maps will be updated on a continuous basis as new information from field investigations and other sources is received, such that the maps are no greater than six months out of date.
