4/30/04

Part II. Self-Assessment

The town of Amesbury has completed the required self assessment. As part of the original NOI for Discharges from Small Municipal Separate Storm Sewer Systems (MS4s), the town proposed to map their stormwater drainage system and outfalls. Due to cuts in state and local funding, however, this work has been delayed until Permit Year 3-5. Once the drainage system is mapped, the Massachusetts Historical Commission, US Fish & Wildlife Service, and Natural Heritage and Endangered Species Program will be contacted to determine whether the eligibility criteria have been met for “listed species”, critical habitat, and the protection of historic properties. In the mean time, the town believes that they are in compliance with the other permit conditions.

In addition to the efforts outlined in Part III regarding compliance with minimum control measures, the town has received three grants which have aided in their stormwater efforts. The first grant is from the DEM for Lakes and Pond Watershed Demonstration, Restoration and Protection projects to be used for work in the vicinity of Lake Attitash. In cooperation with the Town of Merrimac, the Town of Amesbury has performed/will be performing a number of stormwater improvements. 90% of the catchbasins will be replaced with deep sump catchbasins. Five baffle tanks will be installed to trap sediment entering the lake. One Gunderboom will be installed on the Back River to trap nutrient laden sediment emanating from local farms. Beach erosion will be controlled at Camp Bauercrest and sampling of lake water will be conducted for pre- and post-construction conditions. The work under this first grant is scheduled to be completed in August 2004.

The second grant is from the EPA Ch. 319. The work under this grant involves installing deep sump catchbasins and three baffle tanks along Lake Shore Drive as well as the repair/stabilization of two swales and two outfalls. This work is scheduled to be completed in June 2004. The last grant is also from the EPA Ch. 319. The work under this grant involves installing deep sump catchbasins and baffle tanks along Lake Gardner and the Powow River. The work is scheduled to be completed in June 2006.

Part III. Summary of Minimum Control Measures

1. Public Education and Outreach

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) - Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities - Permit Year 2
1a Revised	Public information on voluntary yard waste program	Town Engineer	Publish in newspaper various times	The town published information regarding the hours of operation, location, materials to be collected, etc. for the yard waste program.	Similar efforts will be continued.
1b Revised	Public information about household hazardous waste program	Town Engineer	Publish flyers and notices in paper and radio in the spring	The town published information regarding the hours of operation, date, location, materials to be collected, etc. for the household hazardous waste program.	Similar efforts will be continued.
1c Revised	Public educational brochure	Town Engineer	Coordinate with public awareness groups and update annually	No action taken.	Efforts will be made to prepare an educational brochure and coordinate with local groups and residents to disseminate the information.
1d Revised	Post brochure on town website	IS Dept.	Establish link and update annually	The town posted a generic stormwater brochure on their website.	Efforts will be made to update the website annually.

1a. Additions

2. Public Involvement and Participation

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 2
2a Revised	Voluntary yard waste disposal program	Dept. of Public Works	Conduct annually April-November	The town conducts a yearly voluntary yard waste program from April-November.	Similar efforts will be continued.
2b Revised	Conduct meetings regarding stormwater management	Dept. of Public Works/Town Engineer	Conduct one meeting per year	The Lakes & Waterways Commission conducts open meetings numerous times during the year to discuss stormwater issues.	Similar efforts will be continued.

2a. Additions

3. Illicit Discharge Detection and Elimination

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 2
3a Revised	Map stormwater drainage system and outfalls * see note	Town Engineer	3 year program using GPS equipment with submeter accuracy	No action taken.	* see note
3b Revised	Visually inspect outfalls for dry weather flow * see note	Town Engineer	3 year program concurrent with mapping	No action taken.	* see note

3c	Develop sampling & analyses program to sample outfalls <i>* see note</i>	Town Engineer	3 year program based on results of outfall inspection	No work proposed in permit year 1	* see note
Revised					
3d	Develop program to identify and locate illicit connections <i>* see note</i>	Town Engineer	3 year program to smoke test drains based on results of sampling and analysis	No work proposed in permit year 1	* see note
Revised					
3e	Periodically inspect outfalls	Town Engineer	Annual program once mapping completed. Inspect 25% of outfalls per year	No work proposed in permit year 1	No work proposed in permit year 2
Revised					
3f	Develop stormwater use regulations prohibiting illicit discharges <i>* see note</i>	Town Engineer	Incorporate into comprehensive stormwater ordinance	No work proposed in permit year 1	* see note
Revised					

3a. Additions

4. Construction Site Stormwater Runoff Control

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 2
4a	Develop a comprehensive stormwater ordinance	Dept. of Public Works, Town Engineer, other Depts.	Obtain approval from Mayor and Municipal Council	No work proposed in permit year 1	Efforts will be made by volunteers and town employees to develop a comprehensive stormwater ordinance.

Revised									
4b	Reassess stormwater management plan	Town Engineer	Perform every three years	No work proposed in permit year 1	No work proposed in permit year 2				
Revised									
4c	Require erosion and sedimentation control measure plan prior to construction on all projects	Planning Board, Conservation Commission, Town Engineer	Conduct periodic site inspections and monitor and track violations through reports to the Conservation Commission	The Planning Board requires erosion and sedimentation control plans prior to construction. Site visits are conducted periodically to assure the Contractor is in compliance with his proposed plan.	Similar efforts will be continued.				
Revised									

4a. Additions

5. Post-Construction Stormwater Management in New Development and Redevelopment

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) - Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities - Permit Year 2
5a	Develop standards for regulating stormwater controls for all new and redevelopment projects and inspect controls	Planning Board, Conservation Commission, Town Engineer	Incorporate into comprehensive stormwater ordinance	No work proposed in permit year 1	The town intends to develop these standards in conjunction with the preparation of the comprehensive stormwater ordinance.
Revised					

5a. Additions

6. Pollution Prevention and Good Housekeeping in Municipal Operations

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) - Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities - Permit Year 2
6a	Street sweeping	Dept. of Public Works	Continue program of sweeping twice annually. Track volume of material collected by area. Sweep in late spring and fall with additional sweeping during severe winters.	The town performed street sweeping, however, the amount of debris was not tracked.	Street sweeping efforts will be continued and efforts will be made to track the amount of debris collected during the sweeping.
Revised					
6b	De-icing	Dept. of Public Works	Continue program of using Ice Ban to enhance melting.	Ice Ban was not used to enhance melting.	The town does not intend to continue using Ice Ban.
Revised					
6c	Develop Spill Prevention Control Plan for the DPW Garage	Dept. of Public Works	Implement plan and train employees within one year	A Spill Prevention Control Plan was developed for the DPW Garage.	The town intends to train their employees in accordance with the plan.
Revised					
6d	Catchbasin cleaning	Dept. of Public Works	Continue program of catchbasin cleaning twice annually. Track volume of material removed by area.	Due to limited funding, the town cleaned approximately 50% of the catchbasins. The volume of material collected was not tracked.	The town intends to clean the catchbasins twice on a townwide basis. Efforts will be made to track the amount of debris collected during the cleaning.

Revised									
6e	Trash removal and recycling	Dept. of Public Works	Continue program of trash removal weekly and curbside recycling biweekly.	Dept. of Public Works	The curbside trash removal and recycling programs were conducted.	Similar efforts will be continued.			
Revised									
6f	Yard waste disposal	Dept. of Public Works	Continue voluntary program for resident drop-off of yard waste April-November	Dept. of Public Works	The voluntary yard waste drop-off program was conducted.	Similar efforts will be continued.			
Revised									
6g	Household hazardous waste program	Dept. of Public Works	Continue annual program of conducting a collection day for household hazardous waste	Dept. of Public Works	No work proposed in permit year 1 -- The town conducted a household hazardous waste collection day.	Similar efforts will be continued.			
Revised									
6h	Develop storm drain flushing program	Dept. of Public Works	Annual program where selected drains are cleaned in the spring starting the second year of the permit	Dept. of Public Works	No work proposed in permit year 1	The town intends to clean selected drains, especially in the areas where catchbasins were not cleaned in permit year 1.			
Revised									
6i	Television inspection of storm drains	Dept. of Public Works	Annual program where selected drains are TV inspected in the spring starting the second year of the permit	Dept. of Public Works	No work proposed in permit year 1	Efforts will be made to TV inspect a select number of drains.			
Revised									
6j	Require spill control plans from all non-residential establishments	Dept. of Public Works	Required within one year	Dept. of Public Works	No work proposed in permit year 1	Efforts will be made implement require spill control plans from all non-residential establishments.			
Revised									

6a. Additions

7. BMPs for Meeting Total Maximum Daily Load (TMDL) Waste Load Allocations (WLA) - NOT APPLICABLE

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) - Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities - Permit Year 2
Revised					

7a. Additions

Note:

(*) Due to cuts in state and local funding, proposed work scheduled for Permit Year 2 may be delayed to Permit Year 3.

Part IV. Summary of Information Collected and Analyzed

No information was collected or analyzed.
