## **Annual Report Phase II Storm Water**

The Town of Brewster is in compliance with the NPDES permit #MAR0041096.

Educational materials have been created and will be distributed with stickers purchased for transfer station and beach use.

A Town web site has been established as a stormwater hot-line for information and enforcement.

Mapping of stormwater assets is in its preliminary stages. All structures have been located with hand sketches showing relative positions of the components to utility poles or house numbers, etc. Through the permit period all pertinent aspects will have a GPS location assigned, and will hopefully be included as a layer in the Towns mapping system.

By-law to make illegal, the connection of any non-stormwater discharges to any stormwater systems, is being developed. Possible presentation at Town Meeting in the fall of 2004. Natural Resources and Water Quality Officer regularly samples water from ponds, streams, embankments, etc., and traces sources of pollution.

Amending language is underway for controls at all construction sites greater than one acre by the Development Plan Review Board. Enforcement mechanisms will be included as well as penalties for violators.

Database for inquiries is being established via web-page. Most inquiries will probably be made to appropriate departments, such as Health and Conservation.

The Planning Board is in the process of developing Post-Construction Run-Off By-law with inspection mechanisms to insure compliance.

Public Works training in stormwater management is ongoing with emphasis on reduction of pollutants in operations.

Stormwater systems are inspected annually for cleaning requirements and identified areas of critical concern are dealt with more urgency.
