Part II. Self-Assessment

The first year I have spent a lot of time trying to set up a classroom program with the junior high science teacher. Unfortunately the middle school has been moved to Manchester-By-The-Sea and I am going to have to start all over again with the 6th grade teachers. The Town has been continuing our stormwater sampling project and has been working with the BOH to eliminate illicit discharges to our stormwater system. As our sewer project is in full swing now we have been uncovering and blocking non-permitted drain lines. Several outfall locations have been identified as being in need of repair and we are working to fund these jobs. The planning board has adopted a few new guidelines to help with jurisdiction and enforcement and for next year I hope that we can present a few more. I have some funds available for mailings and I am working on getting a mailing together for our July water bills. The timelines sheet needed some updating after real-time evaluation. Over all I would say that there is a need for more time to work on these projects, as we are a small community with limited resources.
