Part II. Self-Assessment

The City of Marlborough has completed the required self assessment and has determined that our municipality is in compliance with all permit conditions, except the following provisions:

Part D 1-1 – Informational brochures. A draft informational brochure will be reviewed by the Storm Water Management Advisory Committee, which was officially formed in April 2004. The brochure once approved by the committee will be inserted in the residential water bills in the May-July 2004 water bill cycle and annually thereafter.

Part D 3-1 – GIS Mapping – Funding for the mapping of the sewer and water infrastructure was allocated in FY '04 and is underway. This is taking longer than anticipated. Funding for the mapping of the drainage system is being requested in the FY '05 capital budget. We anticipate beginning this mapping portion of the project in our third year 2005. The City does have paper maps of the city's street drainage system, which are fairly accurate and are being used, and will be used with the stream teams. Data from the stream team investigations (Part D 3-5) will be incorporated into the drainage mapping when it is done.

Part D 3-2 – Storm Water Management Advisory Committee - Due to a change in the administration, the formation of this committee was delayed. The City Council formally approved the Committee on April 26, 2004. The Committee will begin meeting in May 2004.
