RE: NPDES Phase II Annual Report, Permit Number MAR041144

Enclosed herewith please find one copy of our annual report of activities under the Stormwater Management Program.

Our point of contact for this report is the Director of Public Works, Mr. Richard R. Sasseville. He may be contacted by phone at 508-234-3581 or by email at rsasseville@northbridgemass.org.

Sincerely,

Michael J. Coughlin, Jr.
Town Manager

Part II. Self-Assessment

The Town of Northbridge has completed the required self-assessment and has determined that our municipality is in compliance with all permit conditions, except for the following provisions:

Part I.B.2(e)(iv) During development of the NOI, the Town made initial contact via email with the U.S. Fish and Wildlife Service for a determination regarding potential impact on listed species or critical habitat. Other than an acknowledgement of receipt, no additional information was received. The Town has initiated an formal follow up request and is awaiting a response from Fish and wildlife.

As part of the Town's self-assessment, a review of the selected BMPs has been conducted. In most instances only limited progress has been made on achieving the proposed result. However, several measures have been taken that clearly show progress toward the desired outcome is being made. The following are highlights of the major accomplishments during the prior twelve-month period:

Waste motor oil recycling: Between March 03 and March 04, the Town's Recycling Committee collected 2,350 gallons of used motor oil, which was sent for recycling. Additionally, 110 gallons of antifreeze, used paint products, mercury bearing wastes, batteries containing heavy metals and electronic components were also collected and disposed of in environmentally responsible fashion.

Winter road sand reduction: The total amount of winter road sand used on Town roads has been significant. The total amount used in 2002-2003 was 2,231.12 tons compared to 1,045.80 tons during the winter of 2003-04. Because winter seasons vary in intensity the average amount of sand used per spreader load has been reduced from approximately 3 tons to approximately 2 tons per truckload., at one-third reduction.

Public Education and Outreach: This element of the program has primarily made use of cable tv notices posted on the Towns local access channel. Notices have provided tips on lawn care including use of fertilizers and other lawn products, car washing, proper disposal of pets wastes, proper disposal of motor oils and solvents and similar environmentally responsible practices. Plans are to produce an informational video as well as make more direct contact with community organizations

Public Involvement and Participation: Cable TV notices have been posted soliciting volunteer involvement in various activities with no response. Additional efforts will focus on direct contacts.

Illicit Discharge Detection and Elimination: The first major achievement has been the completion of a GIS based stormwater system map that consolidates all record drawings and maps into one data base. It is assumed that this information covers approximately 80 percent of the existing stormwater system components. The Town has procured a GPS locator that will allow us to plot the location of undocumented stormwater outfalls and other system components and further define the system map that has been developed. With the map in hand, “dry weather” monitoring of outfalls can be implemented to seek out possible illicit discharges.

Construction Site Stormwater Runoff Control: There are currently 9 active projects in the Town. Particular emphasis has been given to insure that the various projects are aggressively complying with the erosion control provisions of their project approvals. Frequent site visits are conducted, particularly during and following storm events to insure that all erosion control and stormwater measures are in place. When problems have been identified contact has been made with appropriate project management to relate deficiencies and seek corrections. The Planning Board utilizes outside consultants to perform periodic inspections and document compliance with requirements.

Post Construction Stormwater Management in New Development and Redevelopment: Development of local by-law governing post development stormwater management measures is in preliminary planning stage. A guidebook will be developed to address in more detail the specific requirements of the program.

Pollution Prevention and Good Housekeeping in Municipal Operations: The major emphasis in this area has been on improving housekeeping practices in municipal operations. Plans are being developed for construction of new public works garage and maintenance facility, which will significantly improve working conditions and our ability to environmental requirements. Review and update of our current SPCCP is underway. Formalized training for employees will be developed and in-place in the near future.

General Comments and Observations: The Stormwater Management Program represents a significant level of effort for the Town. No additional resources have been provided to meet the requirements of the program. Since limited resources are available within the operating budget, reliance on volunteers, both individual and in the form of existing and new committees, is a major component of the effort. There is a level of technical expertise required to review program requirements and analyze data. While some community have chosen to contract for that expertise, in tight financial circumstances it is beyond the resources of many localities. Within existing constraints, the Town of Northbridge is fully committed to meeting the terms of the NPDES permit and implementing all planned facets of the Stormwater Management Plan.

Part III. Summary of Minimum Control Measures

1. Public Education and Outreach

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 2
1-1 Revised	Business/industry contacts	DPW	Number of contacts	Slow start with no formal contacts made	
1-2 Revised	Community Organizations	DPW	Number of contacts	Healthy lawns seminar held. Approximately 35 persons attended.	Make contact with garden clubs and other organizations offering information from available sources
1-3 Revised	School contact	DPW	Number of student contacts	Contact made with high school environmental group faculty advisor. They have conducted limited monitoring of storm water outfalls	Offer informational program to high school environmental group. Solicit participation in other activities.
1-4 Revised	Storm drain stenciling	DPW	Number of drains stenciled	Cable TV solicitation for volunteers have been run without response.	Will make direct contact with Scout organizations and local watershed associations to solicit volunteers
1-5 Revised	Household hazardous waste collection	DPW/Recycling Committee	Number of pounds collected	Discussions have taken place with Recycling Committee representative and research done to locate state contractors	Plan to conduct one collection in summer/fall time frame of 2004. Funding to be determined.

1a. Additions

1-6	Pollution Prevention Tips on Cable TV	DPW	Number of notices per year	DPW has posted pollution prevention tips on local cable channel	Continue tips with seasonal themes using info from EPA web sites
-----	---------------------------------------	-----	----------------------------	---	--

2. Public Involvement and Participation

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) -- Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities -- Permit Year 2
2-1 Revised	Volunteer stream cleanup	DPW/Conservation Commission	Number of participants	Cable TV solicitation for volunteers have been run without response	Will make direct contact with Scout organizations and local watershed associations to solicit volunteers
2-2 Revised	Volunteer stream monitoring	DPW/Conservation Commission	Number of volunteer hours	Cable TV solicitation for volunteers have been run without response	Will make direct contact with Scout organizations and local watershed associations to solicit volunteers
2-3 Revised	Stormwater video	DPW/Conservation/ Cable TV	Complete Jan 2005	Contact made with volunteer producer from local cable TV. Discussed general concept and production timetable.	Complete locally produced video by end of year
Revised					

2a. Additions

3. Illicit Discharge Detection and Elimination

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 2
3-1 Revised	Storm sewer map	DPW	Completion by Dec 03	A GIS based map of the stormwater system has been prepared using available maps/plans and drawings. Approximately 80% of system	Updates will be made as new information is gathered. New subdivisions will be added as completed.
3-2 Revised	Map updates	DPW	Complete 2006	Portable GPS equipment has been procured.	This equipment will be used to locate and record undocumented outfalls and system components. Hope to use college intern.
3-3 Revised	Stormwater by-law	DPW/Conservation	Complete Jan 05	Conservation Commission has been provided with a copy of the NOI. No formal meetings held to date	Solicit support and assistance of ConCom to develop a draft by-law for presentation to Town Meeting in 2005.
3-4 Revised	Non-storm discharges <i>Illicit connection by-law</i>	DPW DPW	Complete Jan 05 Complete June 05	Conservation Commission has been provided with a copy of the NOI. No formal meetings held to date	Solicit support and assistance of ConCom to develop a draft by-law for presentation to Town Meeting in 2005.
Revised					

3a. Additions

4. Construction Site Stormwater Runoff Control

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 2
4-1 Revised	Sedimentation & Erosion Control Guide	Building/Planning Depts.	Completion Dec 2005	Preliminary research has been conducted. Copies of program documents from other municipalities have been obtained and are under review.	Continue development of local guidebook leading to completion and implementation by planned date.
4-2 Revised	Erosion Control By-law	Building/Planning Depts.	Completion Dec 2005	Existing by-law has been reviewed and identified for update and revision.	Prepare by-law revisions and updates for Town Meeting action. Seek technical assistance from regional planning commission.
4-3 Revised	Inspection & Enforcement	Building/Planning Depts.	Number of inspections	Most project sites are inspected on a weekly basis or more often as conditions warrant. Inspections done by Planning Dept., Building Dept, consultant, Conservation Commission.	Continue site inspections, documenting conditions and directing corrective actions as needed.
Revised					

4a. Additions

5. Post-Construction Stormwater Management in New Development and Redevelopment

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 2
5-1 Revised	Develop Guidebook	Building/Planning Depts.	Complete Dec 2005	Preliminary research has been conducted. Copies of program documents from other municipalities have been obtained and are under review.	Continue development of local guidebook leading to completion and implementation by planned date.
5-2 Revised	By-law Revisions	Building/Planning Depts.	Complete Dec 2005	Existing by-law has been reviewed and identified for update and revision.	Prepare by-law revisions and updates for Town Meeting action. Seek technical assistance from regional planning commission.

5a. Additions

6. Pollution Prevention and Good Housekeeping in Municipal Operations

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 2
6-1 Revised	Employee Education	DPW	Number of man-hours of training	Informal training provided on an occasional basis	Develop standard operating instructions for various activities
6-2 Revised	SPCCP Update	DPW	Completion July 2005	Current SPCCP under review.	Continue review and update of plan
6-3 Revised	Motor oil recycling	DPW	Number of gallons	All used motor oil from Department activities has been recycled. Has been added to oil collected by the Recycling Committee	Continue recycling activities.
6-4 Revised	Reduce winter sand use	DPW	Average tons per storm	Significant reduction in the amount of sand used. 02/03 = 2,231.12 tons, or 3 tons/load, 03/04 = 1,045.80 tons, or 2 tons/load..	Continue to reduce winter road sand usage as conditions will allow.
6-5 Revised	Construct vehicle wash facility	DPW/Town Meeting	Complete Nov 2007	Town Meeting warrant article prepared to fund site investigation study for new DPW facility. Wash facility to be included in new DPW	Continue to work toward funding of design and construction of new facility.
Revised					

6a. Additions

7. BMPs for Meeting Total Maximum Daily Load (TMDL) Waste Load Allocations (WLA) << if applicable >>

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 2
7-1 Revised	Stream monitoring	DPW/Conservation/BoH	Completion date: Two times per year	Volunteers have been solicited via cable TV notices without success. Stream monitoring not yet begun	Direct contact with local environmental organizations will be made seeking assistance.
7-2 Revised	Locate MS4 discharges	DPW	Completion date: January 1, 2004	GPS equipment procured. Survey not completed. Estimated completion July 1, 2004	This effort will be included in 3-2 above.
7-3 Revised	Survey agricultural activities	DPW/Conservation	Completion date: September 15, 2004	Two major agricultural activities identified. No contact made to date	Contacts will be made with information from EPA sources provided.
7-4 Revised	Septic system survey	DPW/Board of Health	Completion Date: September 15, 2004	Contact made with Board of Health. Schedule being developed.	Complete survey by planned completion date.
Revised					

7a. Additions

7b. WLA Assessment

No data available at this time.

Part IV. Summary of Information Collected and Analyzed

The town has completed a GIS based map of the stormwater collection system. Development of the map made use of existing record drawings and other documentation. It is estimated that approximately 80 percent of the system is covered by the new map. GIS locating equipment has been procured that will be used to locate undocumented stormwater collection system components. Particular emphasis will be placed on identifying outfalls not heretofore documented. It is anticipated that the Town will be completed in quadrants over the next two to three years and the system map will be updated periodically as information is gathered.

Part V. Program Outputs & Accomplishments (OPTIONAL)

Programmatic

Stormwater management position created/staffed	No	
Annual program budget/expenditures	No fixed amount.	

Education, Involvement, and Training

Estimated number of residents reached by education program(s). <i>Primarily by Cable TV notices</i>	50%	
Stormwater management committee established	No	
Stream teams established or supported	None	
Shoreline clean-up participation or quantity of shoreline miles cleaned	None	
Household Hazardous Waste Collection Days		
▪ days sponsored	0	
▪ community participation	N/A	
▪ material collected	N/A	
School curricula implemented	No	

Legal/Regulatory

Regulatory Mechanism Status (indicate with "X")	In Place			Adopted
	Prior to Phase II	Under Review	Drafted	
▪ Illicit Discharge Detection & Elimination		X		
▪ Erosion & Sediment Control		X		
▪ Post-Development Stormwater Management		X		
Accompanying Regulation Status (indicate with "X")				
▪ Illicit Discharge Detection & Elimination		X		
▪ Erosion & Sediment Control		X		
▪ Post-Development Stormwater Management		X		

Mapping and Illicit Discharges

Outfall mapping complete	80%	
Estimated or actual number of outfalls (<i>Estimated</i>)	134	
System-Wide mapping complete	80%	
Mapping method(s)		
▪ Paper/Mylar		
▪ CADD		
▪ GIS. <i>Paper maps and record drawings used to develop stormwater map.</i>	80%	
Outfalls inspected/screened	None	
Illicit discharges identified	None	
Illicit connections removed	None	
% of population on sewer	75%	
% of population on septic systems	25%	

Construction

Number of construction starts (>1-acre)	12
Estimated percentage of construction starts adequately regulated for erosion and sediment control	90%
Site inspections completed. <i>On the average all sites are inspected weekly.</i>	100%
Tickets/Stop work orders issued	0
Fines collected	0
Complaints/concerns received from public	9

Post-Development Stormwater Management

Estimated percentage of development/redevelopment projects adequately regulated for post-construction stormwater control.	N/A
Site inspections completed	N/A
Estimated volume of stormwater recharged	N/A

Operations and Maintenance

Average frequency of catch basin cleaning (non-commercial/non-arterial streets)	1/yr
Average frequency of catch basin cleaning (commercial/arterial or other critical streets)	1/yr
Total number of structures cleaned (<i>Approximate number</i>)	750
Storm drain cleaned (<i>Not documented</i>)	N/A
Qty. of screenings/debris removed from storm sewer infrastructure	N/A
Disposal or use of screenings (landfill, POTW, compost, recycle for sand, beneficial use, etc.)	
Cost of screenings disposal	N/A

Average frequency of street sweeping (non-commercial/non-arterial streets)	1/yr
Average frequency of street sweeping (commercial/arterial or other critical streets)	3/yr
Qty. of sand/debris collected by sweeping	N/A
Disposal of sweepings (landfill, POTW, compost, beneficial use, etc.)	
Cost of sweepings disposal	N/A

Anti-/De-Icing products and ratios	74% NaCl 1% CaCl ₂ 25% Sand
Pre-wetting techniques utilized. <i>Liquid CaCl₂ applied at spinner discharge of spreader</i>	Yes
Manual control spreaders used	Yes
Automatic or Zero-velocity spreaders used	No
Estimated net reduction in typical year salt application	None
Salt pile(s) covered in storage shed(s). <i>Mixed sand/salt in working pile uncovered</i>	Yes
Storage shed(s) in design or under construction	No
<i>Estimated net reduction in typical year road sand application</i>	33%
