## Part II. Self-Assessment

The Town of Rowley has made some progress in our Storm Water Management goals for Year One of our program. Following the filing of the Notice of Intent, our pace was on target with the goals as outlined in Year One. The town department heads involved in this program held several meetings and worked together on some of the Year One best management practices. Unfortunately, our progress was hindered with the departure of the Town's conservation commission administrator. The former conservation commission administrator was in the process of writing grant applications for funds which were to be used to cover the expenses related to our best management practices. These grants funds never materialized. Unfortunately, over the past two years, the town has been faced with revenue deficits that resulted in reductions in several budget accounts and a hiring freeze. We've recently hired a new Conservation Commission agent. This action has resulted in our ability to resume the pace of early progress in attaining the goals. Additionally, I've secured town funds to hire a consulting engineer to assist the Town in implementing some of the technical aspects of the best management practices. I serve as the coordinator/facilitator of the Storm Water program and will be working with the department heads this year on Years One and Two goals.
