Part II. Self-Assessment

The Town of Sharon, Massachusetts has completed the required self-assessment and has determined that our municipality is in compliance with all permit conditions, except the following provisions (BMP's on the time frame flow chart):

BMP 3.13: We have not yet developed a formal plan to detect and address non-stormwater discharge but are working with the Conservation Commission on this issue. Sharon has very little industry, so this issue is currently being addressed with a non-formal plan of identifying illegal outfalls while performing catch basin cleanings. To date, no illegal outfalls have been detected.

BMP 4.19: Create sanctions to ensure compliance with E&S requirements: The by-law is being worked on but cannot be approved until November of 2004 at the next Town Meeting.

Part III. Summary of Minimum Control Measures
