Printed Name: Jeffrey Ritter

Title: Executive Secretary

Date: April 30, 2004

Part II. Self-Assessment

The Town had established a number of goals for program year 1 and generally is on target to achieve many of the goals set. The Town appropriated money and has commenced the mapping of the stormwater outfalls. That project also includes some information that may be useful in the detection of illicit discharges. The final project, which is currently anticipated to be available within the next program year will be a data layer on the Town's G.I.S. system and available for all Town Departments and others as a tool.

The Conservation Commission, the Board that the Stormwater Coordinator (the Conservation Administrator) has also adopted Rules and Regulations that incorporate consideration of stormwater within the permitting process under the purview of the Commission. The Commission considers drainage, stormwater pollution plans, and stormwater maintenance as part of their review of applicable projects – those subject to their jurisdiction as well as providing comments to the Planning Board and Department for other projects.

The Conservation Department has created a Stormwater segment on the Town of Wayland web page – a link within the Conservation Commission section, which has been featured on the front page of the Town's web site for a period of time. The Commission's staff prepared a paragraph narrative that was included as part of an insert into one of the town's tax mailings – which goes to all tax payers. The Town has paid its membership fees to the basin organization (SuAsCo) and received a copy of the poster that they distributed which has been displayed in the Town Offices, will be taken to Town Meeting, and later to the Town library. Generally, through a number of means the awareness of stormwater and the issues with water quality are being integrated into the language of the various departments within Town government. Recognition of the need to address stormwater is included within the goals of the Board of Selectmen and there is a growing awareness of the issues related to water quality and runoff.

There are some outstanding items for Program Year 1 that still need to be implemented. The Town of Wayland has numerous Boards/Commissions and will need to create a Stormwater Committee. One reason that this has proceeded with care is to take the time to consider the existing laws, governance and Boards and to not create a separate entity that would conflict with current laws. It was a goal of the Town's Stormwater Management Plan to integrate stormwater activities to the maximum extent possible into the existing structure. Creating another Committee without that integration would not promote coordination but create potential inefficiencies in very limited resources available at the local level. To date, using existing procedures and forums stormwater is becoming part of the vocabulary of the community, which is one of the most important educational components of the Stormwater Management Plan.

Part III. Summary of Minimum Control Measures

1. Public Education and Outreach

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 1 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 2
#1 Revised	Standard Notice w.r.t. Stormwater				Review means/method to assure all review Boards consistent w.r.t. program requirements.
#2 Revised	Stormwater flyer prepared by SuAsCo			Flyer prepared and displayed in a number of places in Town Offices	Continue to make available flyer.
