EPA NPDES Permit number: MAR 041096

Part II: Self Assessment

The Town of Brewster remains in compliance with the NPDES Permit #MAR 041096.

Flyers have been created for educating citizens on stormwater management and will be distributed with beach and transfer station bumper sticker passes.

The Town's web site is monitored and maintained as a hot line for reporting and subsequent enforcement of NPDES violations.

The Town is in the process of acquiring a handheld GPS instrument. With this piece of equipment all structures relating to stormwater management will be coordinated and become a layer in the town's mapping system.

A By-Law to make illegal any non-stormwater discharge to stormwater systems continues to be developed. Possible inclusion to warrant in November '05 Town meeting. Sampling for water quality is continuous. Water quality officer takes samples throughout the year from ponds, streams, embankments etc. and will trace the source of pollutant if any is found.

Work continues to amend language for By-Law controlling construction sites greater than one acre.

A post construction run-off By-law with inspection mechanisms is still being worked on by the Planning Board. It is hoped that these By-Laws will be presented in the Town's Annual Town Meeting in November '05.

All Public Works personnel are trained to recognize and report illicit connections to stormwater systems.

All systems are inspected annually by Public Works Personnel and cleaning is done by bid contract. Cleaning basins began April 25th for this year.
