**7b. WLA Assessment**

For several years the Town has identified the Bass River and Kelley's Bay area as the highest priority for immediate implementation of BMPs. In conjunction with the Town of Yarmouth the Town of Dennis was granted funding for construction of several remediatary drainage systems that are the highest prioritized locations. Additionally, the Department of Public Works has continued its program of identifying and mitigating potential upgradient pollution sources. Furthermore the Town is also in the process of applying of additional CPR funding to design and construct mitigation measures for the existing Route 29 (State Highway) outfall pipe into Bass River. The Town recently purchased a parcel of land adjacent to the river and Route 28 for the sum of \$3.1 million dollars. This property will provide sufficient area to allow for the construction of mitigating measures.

**Part IV. Summary of Information Collected and Analyzed**
