Part II. Self-Assessment

The Town Falmouth has not been able to move forward with the goals for the period of March 05 to March 06 due to a number of factors within the Department of Public works that relate to implementation of policy and operation.

The Department of Public Works is currently in the process of a department wide review of operations, staffing and funding. An internal plan was completed in 2005 and an outside review will be done over the summer of 2006. Additionally, recruiting of a Director following the retirement of the past director in January 2006 is currently underway. The loss of the staff engineer charged with the NPDES permit in July has also impacted work on the program.

Implementation of the Public Participation Program should be in operation by the fall. The Mapping Program is nearly complete. The paper maps have been incorporated into the Town wide GIS mapping. Over the last year the GIS personnel have located nearly all the Town maintained outlets with their GPS equipment. Engineering staff will need to locate some outlets not readily identified.

Regulatory and housekeeping issues cannot be completed until position of Director is filled and Department review has been completed. A recommendation to include NPDES Phase II needs has been sent to the Acting Director for inclusion in the study.
