Part II. Self-Assessment

The Town of Foxborough, MA has completed the required self-assessment and has determined that our municipality is in compliance with all permit conditions, except for the provisions shown below. The exceptions shown below refer to our Form BRP WM 08A and the BMP ID #'s in Part D. Stormwater Management Program Summary.

Part D.1 BMP ID #5 Educate Students & Adults. The present members of the S/W Committee worked with the Town's Recycling Coordinator to design and print a Household Hazardous Waste brochure. School Department handed out this brochure to every student in the school system (preschool, K through 12). We also hope to have the Neponset River Watershed Association aid us for classroom presentations.

Part D.2 BMP ID #10 Stencil CB's. We have been working with the Boy Scouts Organizers and are awaiting selection of an Eagle Scout Candidate to perform the stenciling.

Part D.2 BMP ID #12 Train staff in outfall inspection. Still looking for seminar to provide expertise in this area for our employees to attend. The Neponset River Watershed Association has performed testing in Foxborough and this BMP should be evaluated and possibly revised to include their testing for adherence to the permit.

7b. WLA Assessment

We have begun a procedure where all new catch basins installed by the Highway Dept. include hoods. This has been successful in improving stormwater quality. Our original Subdivision Control Regulations, enforcement of the state's Wetland Protection Act by the Conservation Commission, and our General Bylaws have been effective in improving the quality of stormwater runoff.

We have planned to replace two old culverts and cross-country storm drain that presently allow silt, clay, and debris into the stormwater system. This should improve stormwater quality.

This year's Annual Town Meeting is scheduled for next week on May 8, 2006. The warrant includes an Illicit Discharge Bylaw and should be approved. The article has the full endorsement of the Selectmen and Advisory Committee (Finance Committee).

Water quality testing is being performed by the Neponset River Watershed Association and may be economically and technically advantageous to use this data.

We have also begun a program to subcontract private street sweeping services to supplement the Town's one street sweeper. This will significantly reduce the time to completely sweep the entire town. With the Town's streets being swept in a shorter period will result in less material entering the stormwater system.

Part IV. Summary of Information Collected and Analyzed

We are not at a point within the approved NOI to have performed any sampling and water quality testing with Town staff. However, the Neponset River Watershed Association is performing this testing.
