Title: Chairman - Board of Selectmen

Date: 4/28/06
Part II. Self-Assessment

The Town of Randolph completed its Storm Water Management Plan (SWMP) in May 2004. While some of the Best Management Practices (BMPs) identified in the Notice of Intent (NOI) and the SWMP have been conducted, more will be initiated during Year 4 of the permit period. The Board of Public Works attempted to secure local funds for planned Year 2 activities, but following Town Meeting acceptance, access to those funds were blocked. State funding was secured in March 2006 from the “State Revolving Fund Loan Program for Clean Water Projects” in the amount of $150,000. Matching town funding is anticipated to be appropriated in May 2006 during Town Meeting. If funding is approved, the Town will begin working on planned projects immediately, including storm drainage outfall inspections and sampling, structure locating and mapping using GPS technology, and drainage system mapping development.

Updates to previously submitted information:

Part I.B.2(e) The Town’s permit eligibility with regard to the Endangered Species Act was pending at the time of the NOI submission, and is still considered to be pending. The Town will inspect all Town-owned drainage outfalls during Years 4 and 5 of the permit period, and will sample any outfalls that exhibit signs of dry weather flow or other indications of potential illicit discharge. This information will be used to help determine eligibility with respect to the Endangered Species Act. The Town is attempting to gather enough information to complete this eligibility requirement by the end of Year 4.

The Town has completed the required self-assessment and has determined that the municipality is in compliance with all permit conditions, except for the following provisions:

Part I.B.2(k) The Town had a goal of completing the dry-weather sampling in Years 2 and 3. A delay in the securing of State funding delayed this process. State funding was secured in March 2006 and matching town funding is anticipated to be appropriated in May 2006 during Town Meeting. The Town will identify any discharges that would cause or contribute to instream exceedance of water quality standards during Years 4 and 5 of the permit program.

Part II.B.1-6 Any Provisions of Part II.B.1-6 that have not been met are detailed in Part III below. In particular, many of the public education and involvement BMPs were not implemented in Year 3 of the permit period and the illicit discharge and elimination BMPs will be conducted beginning in Year 4 once funding is secured.
### Part III. Summary of Minimum Control Measures

#### 1. Public Education and Outreach

<table>

7b. WLA Assessment

The cleaning of all Town-owned catch basins provides a tremendous amount of benefit by removing waste and pollutants from storm water, prior to outfall into the Town’s water and wetland resource areas. Sweeping all Town-owned streets also prevents sand, dirt, and debris from carrying pollutants into the drainage system. Also, pipe cleaning and inspection on an as-needed basis prevents a buildup of pollutant carrying sediments from entering into resource areas.
Part IV. Summary of Information Collected and Analyzed

The Town did not conduct any soil, sediment, or water sampling during Year 3 of the permit period. Therefore, there is no data to summarize.

As stated in Part II, the Town has secured State funding and plans to conduct drainage outfall inspections and sampling during Year 4 and Year 5. Laboratory analytical data should be available by the time the Year 4 Annual Report is submitted.

Re: Town of Randolph, Massachusetts
NPDES PII Small MS4 General Permit Annual report

To Whom It May Concern:

On behalf of the Town of Randolph, Massachusetts, we are pleased to submit the NPDES PII Small MS4 General Permit Annual Report for the period March 2005 to March 2006, for your use.

If we can be of any further assistance regarding this matter, please contact us at our office.

Very truly yours,
BETA Group, Inc.
