Title: Town Manager

Date: April 26, 2006

Part II. Self-Assessment

The Town has completed the required self-assessment and has determined that our municipality is in compliance with all permit conditions.

Current State of the Phase II Program in Shrewsbury:

The Town currently budgets \$5,000 per year for the Phase II Program. This cost does not include money used for catch basin cleaning and street sweeping, which is currently budgeted separately with the Town Highway Department. Occasionally funds have been made available for the Phase II Program from other sources within town budget areas as well.

Current budget constraints are expected to have an impact on the Town's ability to complete the required GIS Storm Water Outfall Map. In the past the Town has rented GPS equipment for outfall mapping, and we have located approximately 57 outfalls at Lake Quinsigamond and Flint Pond. Lake Quinsigamond and Flint Pond are both TMDL designated water bodies. The Town hopes to purchase a GPS unit as soon as funding is available to assist in completing the required outfall map.

Last year we noted that budget constraints would impact the Town's ability to create and enforce a bylaw required for BMP's #5, 8, 9, and 13 as described in the Town's Notice of Intent for Discharges from Small MS4s. The Town continues to move forward with the bylaw creation and decided that the Sewer Commission will have jurisdiction of the regulations when in place.

During permit year three the Town constructed groundwater recharge basins at the existing Floral Street Elementary Public School. Funding for the project was acquired by grant application provided by the Intel Assabet Watershed Fund. The project recharges building roof runoff that historically discharged into a nearby perennial stream. The recharge basins provide an estimated average annual groundwater recharge of 1.31 million gallons per year, and will help increase the base flow of the nearby stream.

For residential subdivision projects submitted to the town Planning Board and Conservation Commission, we started requiring groundwater recharge for each lot reviewed where soil conditions are suitable. A typical example would be a drywell to recharge roof runoff from a single family home. This helps control post-construction storm water runoff, provides a broader recharge area, and often provides recharge volumes above and beyond what is required by the Massachusetts Stormwater Management Policy.

Part II. Self-Assessment (continued)

In years past, the Town had not allowed the use of hydrodynamic storm water separator units for public drainage projects due to maintenance concerns. After meeting with manufacturers and reviewing maintenance guidelines, the Town this permit year started approving the usage of those storm water BMP's for public projects and private projects that will become public, such as subdivision roadways. The Town continues its policy to encourage the use of innovative storm water BMP's for private projects as well.

For permit year four the Town will focus on three major components of the Phase II program - the creation of a bylaw, illicit connections detection and elimination, and the GIS mapping of storm water outfalls.

Part III. Summary of Minimum Control Measures

1. Public Education and Outreach

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) -- Permit Year 3 (Reliance on non-municipal partners indicated, if any)	Planned Activities -- Permit Year 4
01 Revised	Pamphlet Mailings	Engineering & Others	# Pamphlets Mailed		Pamphlet Mailings, location(s) to be determined

6a. Additions

Part IV. Summary of Information Collected and Analyzed

Water samples were tested weekly during the bathing season at Sunset Beach for E. Coli and Total Coliform Levels. The Town Health Department has reported that no violations of the water quality standards for bathing beaches were detected at Sunset Beach during 2005. Additional testing was performed during the summer of 2005 due to the release of wastewater into Lake Quinsigamond by the City of Worcester on July 20th, 2005.
