SUASCO 5-Year WATERSHED ACTION PLAN

Monday March 28 Cordaville Hall. Southborough, 7:30 PM

The EOEA (MA Executive Office of Environmental Affairs) has contracted with Ambient Engineering of Concord, MA and the SuAsCo Watershed Community Council to conduct the 5-Year Watershed Action Plan (WAP) for the SuAsCo Watershed.

Components of the WAP:

- **Assessment Report** - compilation of environmentally-related reports in the SuAsCo Watershed, including GIS Maps, municipal open space plans, documents from regional agencies and organizations, etc.
- **Determining Environmental Priorities and Priority Actions** - as determined by the Assessment Report results and discussion by the SuAsCo Watershed Community Council Steering Committee and general public
- **Public Review** - four public forums to solicit public input and comment on environmental priorities and priority actions
- **Publication of Recommendations**

Environmental Priorities: a list of issues and problems currently affecting, and which may create future impact upon the environmental health of the SuAsCo Watershed. From this list, the problems that are consistently and repeatedly cited will be identified as potential priorities for attention.

Priority Actions: Priority Actions are not limited to projects best suited for government action, but can also identify potential actions that could be taken by other stakeholders in the watershed. Priority Actions must be selected on the basis of public benefit. Priority Action projects should include a description of the public environmental benefit, potential advocates for the project, an estimate of cost, a timeline, and potential funding sources.

The WAP's success will depend largely upon the participation of the general public
