Date: **April 10, 2007**

The following BMP's were instituted in order to comply with the NPDES Phase II

Stormwater Management Plan

BMP 1-1 / 1-2: Measurable Goal – Develop article or Brochure and make available at Town Public Buildings with assistance from Buzzards Bay Project.

Brochure's outlining the importance of Stormwater Management is available at the Board of Public Works, Town Hall, Library, and Post Office. (Ongoing)

BMP 1-3: Measurable Goal – Display Stormwater message on the local cable television station.

A Stormwater tip of the week is being displayed on the local cable television station. (Ongoing)

BMP 1-4: Measurable Goal – Discuss Stormwater issues at Board of Public Works meetings.

Stormwater issues are regular topics at Board of Public Works meetings and will be ongoing.

BMP 1-5: Measurable Goal – Educate dog owners about picking up dog waste by developing and distributing a fact sheet.

A pet waste fact sheet was developed and is distributed to pet owners when dog licenses are issued. (Ongoing)

BMP 1-6: Measurable Goal – Contact the School Department to schedule a presentation regarding the importance of Stormwater.

A video entitled "After the Storm" which was co-produced by the EPA and the weather channel was shown to the Science Class in the Hastings Middle School in May, 2006.

BMP 1-7: Sign postings in public water supply areas. Measurable Goal – number of signs installed and inspected.

Water Supply Area signs were installed on Mill Road just north of Shady Drive and on Route 6 at the Nasketucket River, and New Boston Road.

BMP 1-8: Measurable Goal – Household hazardous waste day held.

Household Hazardous Waste day was held on Saturday, September 23, 2006.

BMP 1-9: Household paint drop off facility. Measurable Goal – Notify residents of days of operation and advertise on local cable television. Paint cans were collected at the Hazardous Waste day due to the fact the paint shed was not funded at Town Meeting for 2006 – 2007.

Town Meeting did not support the running of the Paint Shed program this fiscal year. If Town Meeting Supports Hazardous Waste day for 2007 – 2008 then, residents will be notified and the paint can be collected at that time.

BMP 1-10: Develop Ad Hoc Committee. Measurable Goal – number of meetings.

Ongoing

BMP 2-1: Comply with state public notification guidelines at MGL Chapter 39 Section 23b. Measurable Goal – Notices as currently announced.

Meetings of every Town Board / Commission regarding Stormwater and other issues are advertised in the local paper and on local cable television.

BMP 2-2: Stencil Storm Drains. Measurable Goal – Number of Basins Stenciled.

All Basins were stenciled in the second permit year. They will again be stenciled in the spring of 2007 permit year utilizing some help from the local Boy Scout troop.

BMP 2-3: Annual Beach Cleanup Day. Measurable Goal – Beach Cleanup day held.

Numerous Beach Cleanup days were held throughout 2006 with the Coalition for Buzzards Bay. Every third Wednesday of the month a Beach Cleanup was performed from May through October. There were several shoreline cleanups by Nye's Oil Company employees at their Howland Road complex. In all cleanups, the Highway Department supplied and picked up dumpsters, and provided manpower for trash bag pickup. The Town also tested a beach comber, provided by the City of New Bedford, to clean the West Island Town beach.

BMP 3-1: Develop illicit discharge ordinance. Measurable Goal – Develop ordinance and seek Town Meeting approval.

Will be presented for approval at town meeting May 2007

BMP 3-2: Conduct dry weather outfall screening. Measurable Goal – Prioritize and sample 14 outfall locations.

Dry weather outfall screening was performed on August 17, 2005 at fourteen locations. Of the fourteen outfalls, eleven were found to have no flow. Three of the outfall locations did have flow and were sampled and tested for PH and Fecal count. The PH of the three samples ranged between 6.4 and 6.8. The Fecal count on two locations ranged from 12c/100ml and 30c/100ml. One sample at the outfall near the Pease Park boat ramp came back with a result to numerous to count. This location will be re-sampled during the summer of 2007 to verify the results.

BMP 3-3 Map the storm water collection system. Measurable Goal – Complete map of all outfalls and catch basins.

The mapping of the Stormwater collection system is now substantially completed. All catch basins and outfalls have been mapped and drainage pipes (sizes and types), have been mapped. The format is in Photoshop. We have also obtained a GIS version of the Stormwater collection system from the Buzzards Bay Coalition through a mini grant.

BMP 3-4: Develop and implement plan to identify non storm water discharges to the MS4. Measurable Goal – Number of illicit connections found and removed.

One illicit connection was found during our annual Catch Basin cleaning program. House # 11 Weeden Place was found discharging laundry water into a catch basin in front of the property. The board of Health sent a registered letter to the homeowner and the pipe was redirected into their septic system.

BMP 4-1 Amend existing Town Subdivision / zoning regulations to require an erosion and sediment control plan for all construction sites greater than 1 acre. Measurable Goal – Amendment developed.

The town has yet to adopt the amended Subdivision / Zoning regulations. The regulations will be presented to town meeting for approval in May of 2007.

BMP 4-3 Consideration of public input. Measurable Goal – Per Massachusetts General Law notification requirements, hold public hearings with opportunity for the general public as well as abutters to review and comment.

Ongoing

BMP 5-1 Determine necessity of Storm Water BMP reference manual. Measurable Goal – Complete review of existing Storm Water regulations and determine necessity of Storm Water reference manual; select BMP reference manual.

Ongoing

BMP 5-2 Ensure long term maintenance of town playing fields and structural BMP's. Measurable Goal – Continue maintenance of town playing fields and structural BMP's.

The maintenance of Town playing fields is an on - going practice. Developers are required to submit for review a description of all new BMP's along with a 20 year maintenance fee of the proposed project.

BMP 5-3 Evaluate existing structural BMP's for efficiency. Measurable Goal – Create BMP inventory.

An inventory of Structural BMP's complete. A maintenance plan is on – going as catch basins are repaired as needed, and drainage swales / ditches are cleaned annually.

BMP 5-4 Review site plans for storm water impacts. Measurable Goal – number of site plans reviewed.

On going

BMP 6-1 Identify sensitive receptors within the Town. Measurable Goal – List of Sensitive receptors developed, staff notified.

A list of seven sensitive receptors has been identified and employees have been notified to report any unusual circumstances or obvious signs of pollution.

1. Town Beach
2. Nasketucket Bay
3. Nasketucket River Basin
4. Acushnet River
5. Buzzards Bay
6. Winsagansett Salt Marsh
7. Tidal Pond off Potter Street

BMP 6-2 Street Sweeping. Measurable Goal – Percent of streets swept annually, volume of residuals collected.

The Town roads are swept in the spring and the fall, (more often if necessary). Records are kept of streets swept and volume of residuals collected.

BMP 6-3 Roadway De-icing. Measurable Goal – Alternative deicers evaluated; sand / deicer compound mixture modified if necessary; calibration records maintained; record amount of deicers used.

The deicers and compound mixtures the Town currently uses are proving to be beneficial. For the first time during the winter of 2005 - 2006, the Town switched from calcium chloride to Ice Ban for on board pre-wetting of sand salt mixture on the three sanders. Ice Ban is a blend of brewer's condensed solubles, a very powerful naturally occurring, environmentally friendly de-icing agent. Calibration of spreaders is done each time the sanding crew gets called out. Calibration records and amounts of deicers are recorded each year.

BMP 6-4 Snow Disposal. Measurable Goal – List of snow disposal sites selected.

Four disposal locations have been designated (if necessary), for snow:

The Standard Times field off of Bridge Street, the Landfill off of Bridge Street, the Town Recycle area at the end of Arsene Street, and at the Long Road facility.

BMP 6-5 Minimize impacts from hazardous materials associated with vehicle maintenance.

Measurable Goal – Volume of material removed from the catch basin located within the containment area.

The containment area catch basin was cleaned once this year, and the residuals were delivered to the Crapo Hill Landfill in New Bedford.

BMP 6-6 Minimize impacts from hazardous materials associated with vehicle maintenance.

Measurable Goal – Amount of hazardous materials used; amount of waste materials hauled from our garage by licensed hazardous waste hauler.

All waste oil and anti freeze continues to be removed by a licensed hauler. Inventories of materials removed are recorded and filed. All batteries are brought to A.W. Martin for proper disposal.

BMP 6-7 Storm Drain maintenance. Measurable Goal – Number of catch basins cleaned annually; volume of residuals collected annually; number of storm drains jet rodded annually.

A total of 1807 catch basins are cleaned annually and volumes collected and recorded and filed. An ongoing list of drainage pipes that were jet rodded in the past year was maintained on file at the Highway Department.

BMP 6-8 Tree planting and maintenance. Measurable Goal – Number of trees planted per year.

The Tree Department along with help from the Highway Department, plants between 40 and 50 trees annually.

BMP 6-9 Illegal dumping control. Measurable Goal – Number of signs posted; number of sites cleaned up.

Nine problem dumping areas have been identified and these areas are continually monitored and cleaned as necessary. A list is on file at the Highway Department. One “No Dumping” sign was installed at the Lambeth Park cul de sac.

BMP 6-10 Spill prevention and response plan for the Board of Public Works. Measurable Goal – Train employees.

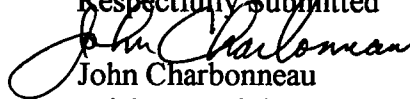

A Spill Prevention / Response Plan was developed four years ago and is updated annually as necessary. The employees have been instructed as to the location of the spill kit and emergency phone numbers are posted near the garage telephone.

BMP 6-11 Residual materials disposal. Measurable Goal – Continue to haul to Crapo Hill Landfill in New Bedford.

All street sweepings and catch basin cleaning residuals are delivered to the Crapo Hill Landfill in New Bedford for disposal.

The Town of Fairhaven is committed to preserving clean water and a safe environment for all citizens. We hope the following BMP practices go a long way into achieving the long term goals of a cleaner and safer living space.

Respectfully Submitted

John Charbonneau
Fairhaven Highway Superintendent

Part V. Program Outputs & Accomplishments

Programmatic

Stormwater management position created:	Yes / using in house personnel
Annual program budget / expenditures:	\$500.00 / Printing flyers and dog fact sheets. Purchasing and installing water supply signs.
Total program expenditures since beginning: of permit coverage.	\$2000.00
Funding mechanism:	Highway department budget.

Education, Involvement, and Training

Estimated number of property owners reached: by education programs	75% / through cable TV announcements, Stormwater handouts school video presentations, pet fact sheets.
Stormwater committee established:	Yes
Stream teams established or supported:	Supported
Shoreline clean-up / quantity of shoreline: miles cleaned.	Yes / The Coalition for Buzzards bay held a shoreline cleanup every third Wednesday of the month from May through October. The Highway Department supplied and picked up dumpsters and provided manpower for trash bag pickup. There were also several monthly shoreline clean-ups performed by employees of Nye's Oil Company at their Howland Road facility. Approximately 10 miles of Fairhavens' shorelines have been cleaned. The Coalition of Buzzards Bay is working to expand the shoreline cleanup program in the coming year.

Shoreline cleaned since beginning of permit coverage. Approximately 40 miles of shoreline cleaned.

Household Hazardous Waste Collection days:
* days sponsored One day.
* community participation 75%
* material collected 7 Tons

School curricula implemented: Yes

Legal / Regulatory

Regulatory Mechanism Status

* Illicit Discharge Detection and Elimination: In place prior to Phase II
* Erosion & Sediment Control: In place prior to Phase II
* Post-Development Stormwater Management: Draft being presented at May town meeting.

Accompanying Regulation Status

* Illicit Discharge Detection and Elimination: In place prior to Phase II
* Erosion & Sediment Control: In place prior to Phase II
* Post-Development Stormwater Management: Draft being presented at May town meeting.

Mapping and Illicit Discharges

Outfall mapping complete: 100%
Actual # of outfalls: 60 Known
System-wide mapping complete: 99%
Mapping methods
* Paper /Mylar: 100%
* CADD: 20%
* GIS: 100%
Outfalls inspected / screened: 14
Outfalls inspected / screened since beginning: 14
of permit coverage
Illicit discharges identified: 1
Illicit discharges identified since beginning: 11
of permit coverage
Illicit connections removed: 1
Illicit connections removed since beginning: 11
Of permit coverage
% of Population on sewer: 75%
% of Population on septic systems: 25%

Operations and Maintenance

Average frequency of catch basin cleaning: Non-commercial / non arterial streets.	Once yearly
Average frequency of catch basin cleaning: Commercial / arterial or other critical streets.	Once yearly
Quantity of structures cleaned:	1807
Quantity of storm drain cleaned:	9190 LF
Quantity of screenings / debris removed: From storm sewer infrastructure.	513 Tons
Disposal or use of screenings:	Crapo Hill Landfill in New Bedford.
Basin Cleaning Costs	
* Annual Budget:	Done in House
* Disposal Cost:	Cost of fuel to transport to New Bedford landfill.
Cleaning Equipment	
* Clam shell trucks owned:	One
* Vacuum trucks owned / leased:	None
* Vacuum trucks specified in contracts:	No
* % of structures cleaned with clam shell:	100%
Average frequency of street sweeping: non-commercial/ non arterial streets.	2 to 3 times per year
Average frequency of street sweeping: commercial / arterial or other critical streets	2 to 3 times per year
Quantity of sand / debris collected by sweeping:	1890 Tons
Disposal of Sweepings:	Crapo Hill Landfill in New Bedford.
Annual Sweeping Costs	
* Annual Budget Expenditure:	Done in house.
* Disposal Cost:	Cost of fuel to transport to New Bedford landfill.
Sweeping Equipment	
* Rotary brush street sweepers:	1 Owned
* Vacuum street sweepers:	None
* Vacuum street sweepers specified in contracts:	None
* % of roads swept with rotary brush sweepers:	100%
* % of roads swept with vacuum sweepers:	0 %
Average Ratio of Anti / De-icing products:	Sand 66% Rock Salt 34%

Liquid Calcium Chloride is no longer used,
Ice Ban is now used which is an environmentally
safer product.

Pre-wetting techniques utilized:	Yes
Manual control spreaders used:	Yes
Zero-velocity spreaders used:	No
% of Salt / chemical piles covered in storage shed:	100%
Storage sheds in design or under construction:	No
100% of salt / chemical piles covered in: storage shed by May 2008	Yes
