Part II. Self-Assessment

In general, the Town of Halifax's stormwater management activities for the third year of the General Permit (March 2006 through March 2007) were in conformance with the Notice of Intent (Massachusetts DEP form BRP WM 08A) and schedule submitted in July 2003. The Town has developed a Stormwater Plan with program priorities for 2003-2008 including:

1. Achieving regulatory compliance, particularly EPA and DEP Phase II NPDES permit requirements;
2. Incorporating storm water protection measures into municipal activities;
3. Focusing activities on target pollution reduction (e.g. Section 303.d waters and protecting the Town's water supply);
4. Ensuring that the Program is current and innovative; and
5. Providing Program administration.

The Water Quality Stewardship element of the program will focus in the protection of the local water supply and addressing the State's Section 303.d waters located within the Town. To this end, staff will continue to develop and improve the Program activities to reduce stormwater pollution to the maximum extent practicable and eliminate prohibited non-storm water discharges, while facilitating understanding and involvement in storm water management by various Town departments. Program priorities will also focus on increased efforts to reduce target pollutants and restore local water bodies.

The Town is committed to working with local watershed associations to advance their goals and objectives. Another high priority of staff will be to keep abreast of the latest technology and approaches to achieve storm water management. Program activities will also strive to encourage environmental stewardship and continue to build on partnerships with other agencies, neighboring towns, and the community for active participation on accomplishing the Program mission.

During Permit Year Three, the Town focused on the prepared Stormwater Management Plan; in obtaining local funding; mapping catch basins; reviewing current regulations; improving local food housekeeping programs; and communication the Town's Plan to local watershed associations. This required communication among the various departments in town. Continued financing of the project is critical for the proposed program success. The long-range scope of work required a meeting by our consultant (Environmental Partners Group) with the Massachusetts Department of Environmental Protection on March 16, 2004.

The DEP-approved scope of work will focus on GIS mapping and outfall screening and sampling. The Town has partnered with Old Colony Planning Council (OCCPC) for developing a new Geographic Information System (GIS) of the storm drain system, receiving

**Part III. Summary of Minimum Control Measures**

**1. Public Education and Outreach**

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 4 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 5
1 Revised	Partnership with local Watershed Associations	Con. Comm., DPW, BOH	Regular Meeting Attendance	Taunton River Watershed Association (TRWA)	Continued updating, seek alternative funding opportunities (such as 604b and 319 grants, and SRF Funding)
2 Revised	Develop Brochures	DPW	Quarterly Mailings	Water department mailings and water quality updated.	Continued mailings.
3 Revised	WEB Site Public Service Postings	IT Dept., DPW	WEB Site Publication & Maintenance	TRWA information transfer and date publication of data, local WEB updates	TRWA information transfer and data publication of data, local WEB updates
