Part II. Self-Assessment

During Permit Year 4, April 1, 2006 – March 31, 2007, the Town of Maynard underwent staffing changes critical to implementing the Stormwater Management Program. Three new municipal employees were hired: 1) a new DPW Director 2) a new Conservation Commission Agent and 3) a new Planning Board Assistant. These staff changes stalled a number of action items included in the Stormwater Management Program in Maynard, and delayed meeting of the Stormwater Management Team (SWMT).

This permit year, Maynard re-assessed its entire Stormwater Management Program. The new staff is resurrecting the SWMT, and the group plans to address the items described in this report to meet the conditions of the General Permit. Maynard is currently behind schedule on a number of BMPs, but the new members of the SWMT plan to revamp the stormwater program and are committed to meeting the General Permit requirements by the end of Permit Year 5.

During this permit year's review process, a number of BMPs were identified as redundant or infeasible. To improve efficiency of the Town's stormwater program, as well as expedite EPA review of the program, many BMPs were modified during Permit Year 4. Justification and replacement BMPs, when necessary, have been noted for each of these changes.

Notes on the Permit Year 4 Annual Report:

1. This report summarizes the activities scheduled for the prior four permit years and documents the Town's progress in each permit year. This will help the new SWMT complete tasks scheduled for Permit Year 5.
2. Measurable goals by Permit Year were extrapolated from the "Time Frames" page in the original NOI.

Part III. Summary of Minimum Control Measures

1. Public Education and Outreach

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 4 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 5
