Part II. Self-Assessment

The City made progress on all the minimum control measures required in the permit.

The City completed a draft Stormwater Management Ordinance (Ordinance) and draft Stormwater Management Rules and Regulations (Rules and Regulations) which incorporate required new authority and jurisdiction items for the Illicit Discharge Detection and Elimination, Construction Site Stormwater Runoff Control, and Post-Construction Stormwater Management minimum control measures. The City held a workshop on November 2, 2006 to discuss ordinance language and roles and responsibilities for stormwater management. The draft Ordinance and Rules and Regulations are currently under review by the City Solicitor and Mayor's office. The City plans to finalize and adopt the Ordinance in Year 5.

The City has researched the procedure to modify the Sewer Commission's responsibilities to include a stormwater advisory committee role. Recommendations to modify the Commission's responsibilities are currently under review by the City Solicitor and the Mayor's office, however City officials may feel it necessary to develop a new committee. This will be resolved in Year 5.

The City developed a draft Stormwater Master Plan during Year 4, which documents drainage system inspections conducted in Year 3, mapping efforts throughout the permit term, and recommendations for maintaining permit compliance. The Master Plan includes priority lists for maintenance and repair of stormwater system structures. It also includes recommendations for completing GIS mapping efforts, continuing and improving pollution prevention efforts at municipal facilities, and identifies public awareness and possible illicit discharge issues.
