Part II. Self-Assessment

The Town has now completed our storm water sampling project as required by the DEP. With our sewer project completed, we have been working with the Board of Health, mandating failed septic systems be hooked into sewer. Several catch basins have been replaced or rebuilt and several outfall pipes have been repaired. I have some funds available for mailings and we have set up a flyer board at the Water Filtration Plant. We have again been working with Greenscapes on public education and mailings. I have had no progress on the elementary school education as I have had little time to deal with this issue this year. I have been working with an Eagle Scout on drain stenciling and he is going to use this to achieve one of his badges. We have identified several illicit connections to our storm drain system. These residents were required to file the appropriate paper work with the DPW. As in past years funding is a concern as well as limited manpower.
