Part IV. Summary of Information Collected and Analyzed

Through the use of a Town-owned scoop truck and a small contract with an independent contractor, all catch basins in the entire Town drainage system were cleaned in 2007. The Town plans to continue a yearly cleaning schedule of all catch basins. This information will be used to help develop the catch basin and drainage inspection program.

The Town teamed with the Blackstone River Coalition to conduct dry weather sampling in year five. None of the three outfalls with dry weather flow contained unacceptable levels of E. coli.
