Re: National Pollutant Discharge Elimination System (NPDES) General Permit for Storm Water Discharges from Small Municipal Separate Storm Sewer Systems (MS4s)

Annual Report for Town of Wenham (Permit Year 6)

Permit Number: MAR041230

Dear Ms. Herrick:

Please find the enclosed Annual Report for Permit Year 6 for the Town of Wenham, Massachusetts. This report is submitted pursuant to the requirements of EPA's "National Pollutant Discharge Elimination System (NPDES) General Permit for Storm Water Discharges from Small Municipal Separate Storm Sewer Systems" issued May 1, 2003.

Very truly yours,

TOWN OF WENHAM, MASSACHUSETTS

Jeff A. Chelgren
Town Administrator

Enclosures

cc: Mr. Bill Tyack – Director of Public Works, Town of Wenham

Municipality/Organization: Town of Wenham, Massachusetts

EPA NPDES Permit Number: MAR041230

MassDEP Transmittal Number: W-

**Annual Report Number
& Reporting Period:** April 1, 2008 – March 31, 2009

NPDES PII Small MS4 General Permit Annual Report (Due: May 1, 2009)

Part II. Self-Assessment

The Town of Wenham has completed the required self-assessment and determined that our municipality is in compliance with the permit conditions. The town has finished all of the goals listed in Part III of this permit.

The town has continued the process of replacing older non-BMP style catch basins (CBs) with new deep sump CBs. The Public Works had a budget of approximately \$25,000 for replacements for the past Permit Year 6. The Public Works Department replaced six non-BMP style catch basins (CBs) with new deep sump CBs. Additionally, the Public Works Department has a budget of approximately \$17,000 (to be voted on at the next Town meeting) for at least one (one dependent) further replacements during the upcoming Permit Year.

All of the catchbasins and outfalls in town were inspected during Permit Year 6. The Public Works/Highway Department did not observe any additional dry weather flow (possible illicit connections) during any of these inspections that were not sampled during the previous Permit Year 5. Please note, there was no contamination discovered during the inspections of the dry-weather flows in year 5.

The Town has scheduled a cleanup day for Earth Day (April 25, 2009). Community groups, boy scouts, senior citizens, volunteers, along with DPW workers will work to cleanup the wetland areas throughout the Town to improve the cleanliness and water quality of these areas.

The DPW changed their de-icing product from road salt (sodium chloride) and sand to a proprietary product called Ice Ban 50/50 and sand. Ice Ban 50/50 is a mixture of 50% of magnesium chloride and a proprietary blend of brewer's concentrate, a by-product of the domestic brewing industry. This is an environmentally friendly product that the manufacturer claims will result in a greater than 50% reduction in chloride ions introduced into the environment as opposed to the use of road salt.

To date all of the drainage structures have been located in the field, inventoried using Global Positioning System (GPS) and photographed.

Part III. Summary of Minimum Control Measures

1. Public Education and Outreach

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 6 (Reliance on non-municipal partners indicated, if any)	Planned Activities
1A Revised	Brochures/Fact Sheets	Public Works Department	Develop & distribute to all residents in water bill. Develop & distribute to residents at Town Meetings.	Informational fliers were distributed at the Fall 2008 Town Meeting.	The informational fliers will be distributed again at Town Meeting.
2A Revised	Storm Drain Stenciling	Public Works Department	Stencil storm drains at various locations around schools.	Stenciling of the storm drains continued in year 6 To date approximately 80% of the Town owned storm drains have been stenciled.	Storm drain stenciling to continue. Expecting to stencil remaining storm drains during the upcoming year.
3A Revised	Develop web site	Public Works Department	Develop a public informational website.	Continued updating and maintaining the online GIS system of outfalls and storm drain infrastructure as necessary. Continued the process of linking digital pictures of CBs and outfalls to the online GIS system.	To date all of the Town identified drainage structures have been located in the GIS system. The Town will continue updating and maintaining the online GIS system as necessary.
4A Revised	Implement stormwater hotline	Public Works Department	Create a hotline that residents may use for information/reporting problems.	There were no calls from residents to the DPW about stormwater issues in the past year. If any calls about stormwater issues are received they are routed to the appropriate people at the Public Works/Highway Department. A log is being kept at the DPW to document all stormwater related calls that are received.	Continue to inform residents of the proper town offices to contact if they need information or to report problems dealing with stormwater issues. Logs will continue to be kept with information on the calls received and the actions/responses performed.
Revised					

1a. Additions

--	--	--	--	--	--

2. Public Involvement and Participation

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 6 (Reliance on non-municipal partners indicated, if any)	Planned Activities
1B Revised	Storm drain stenciling	Public Works Department	Public information.	Stenciling of the storm drains continued in year 5. To date approximately 80% of the Town owned storm drains have been stenciled	Storm drain stenciling to continue. Expecting to stencil remaining storm drains during the upcoming year.
2B Revised	Household hazardous waste collection	Public Works Department	Annual collections to promote a cleaner environment.	A household hazardous waste drop off day for residents occurred in September 2008.	A household hazardous waste drop off day for residents is currently scheduled for September 19, 2009 at the Wenham DPW.
3B Revised	Community cleanup	Public Works Department	Schedule community cleanup days to promote community awareness.	A community cleanup of Pleasant Pond took place the second weekend in June 2008.	Pleasant Pond community cleanup days are scheduled annually on the second weekend of every June. Additional community cleanup days for, specifically the Miles River, are in discussion. The Town has recently scheduled a town-wide cleanup day for Earth Day, April 25, 2009.

4B	Adopt a storm drain	Public Works Department	Have individuals/ groups cleanup storm drains to promote public awareness.	During Permit Year 6 advertisements on cable access television were run asking for volunteers. However, no community groups have shown interest in participating in the adopt-a-storm drain program. Eagle Scouts were asked about interest but were already busy with other projects they were involved with.	Continue to run advertisement for volunteers on cable access television. Inquire with local Eagle Scouts again to see if they have interest in program.
Revised					

2a. Additions

3. Illicit Discharge Detection and Elimination

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 6 (Reliance on non-municipal partners indicated, if any)	Planned Activities
1C Revised	Mapping	Public Works Department	Mapping catchbasins & outfalls with GIS/GPS.	All drainage structures have been field located, inventoried and mapped using GIS. A total of 199 outfalls, 615 catchbasins and 114 drainage manholes have been mapped on GIS.	Maintain the GIS mapping and continue to map any new drainage structures as they are constructed.
2C Revised	Identify problem areas	Public Works Department	Inspection of outfalls in dry/wet conditions to determine illicit connections.	Continued inspections of CBs during annual CB cleanings. No additional dry-weather flows were observed that had not been previously inspected and sampled during Permit Year 5. Please note, there was no contamination discovered during the sampling/testing of the dry-weather flows in year 5.	Continue to inspect the catchbasins and outfalls during annual cleanings for signs of illicit connections. Where signs of illicit connection are observed, samples will be taken of the outfall discharge and will be analyzed for typical illicit connection contaminants.
3C Revised	Develop regulations/fines	Public Works Department	Submit a town ordinance to be voted on to establish regulation/fines for illicit discharges.	The ordinance was presented and passed during the May 3, 2008 Town Meeting (Permit Year 5).	The DPW will continue to enforce the regulations for illicit discharges.
4C Revised	Elimination of illicit discharge	Public Works Department	Perform smoke testing on drainage systems to determine/eliminate illicit discharges.	No smoke testing occurred during the past year because no signs of illicit discharges were observed during the inspections of the drain structures.	Any suspected illicit discharges noted during the annual CB/outfall inspections by the Public Works/Highway Department will be sampled and analyzed for typical illicit connection contaminants. If contaminants are found, smoke testing will occur to locate and eliminate the source of the discharges.

3a. Additions

4. Construction Site Stormwater Runoff Control

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 6 (Reliance on non-municipal partners indicated, if any)	Planned Activities
1D Revised	Ordinance/regulatory mechanism for development	Public Works Department & Planning Board	Limiting stormwater run-off.	The town has reviewed and amended their existing regulations to include provisions for construction site stormwater runoff controls.	The appropriate Town committee will use and enforce their recent regulation revisions covering construction site stormwater runoff control.
2D Revised	Site plan review	Public Works Department, Conservation & Planning Board.	Limiting storm water run-off.	All proposed construction projects will have to be reviewed and signed off on by the Public Works Department and by the Project Review Committee (PRC), which includes among others the Planning Board and the Conservation Commission.	The Public Works Department and the PRC will continue to review all proposed plans for new/re-development in the town.
3D Revised	Site inspection	Public Works Department Public Works Department/Town Boards.	Compliance with newly adopted ordinance.	Site inspections performed by the Public Works Department and by the appropriate town committees (Planning Board/Conservation Commission).	The Public Works Department and by the appropriate town committees (Planning Board/Conservation Commission) will continue to perform site inspections for new/re-development in the town.

5. Post-Construction Stormwater Management in New Development and Redevelopment

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 6 (Reliance on non-municipal partners indicated, if any)	Planned Activities
1E	Develop structural / non structural BMP's	Public Works Department	Reduce pollutants.	Six non-BMP style CBs were replaced with new deep sump CBs. The town implemented a rain barrel program and sold 25 rain barrels during the previous permit year to residents. The DPW changed their de-icing product from road salt (sodium chloride) and sand to a proprietary product "Ice Ban 50/50" and sand. Ice Ban 50/50 is a mixture of 50% of magnesium chloride and a proprietary blend of brewer's condensed solubles - a by-product of the domestic brewing industry.	The Town has obtained approximately 25 rain barrels available to residents for the upcoming permit year. The Public Works Department will continue to promote the use of infiltration BMPs for new/re-development and require all new/replaced CBs have deep sumps. Continue the use of Ice Ban as the primary road de-icer. The Public Works/Highway Department has \$17,000 in their upcoming budget (to be voted on at Town meeting) dedicated to replacing older non-BMP style CBs with new deep sump CBs.
Revised					
2E	Ordinance governing post construction	Public Works Department / Town Boards	Reduce pollutants.	The town has reviewed and amended their existing regulations to include provisions for post-construction stormwater management in new and redevelopment projects.	The appropriate Town committee will use and enforce their recent regulation revisions covering post-construction stormwater management in new and redevelopment projects.
Revised					
3E	Ensure long-term maintenance	Public Works Department / Private	Assure long-term maintenance.	Continued aggressive maintenance plan for the town owned BMPs with annual inspections by the Public Works/Highway Department. Issued 6 permits to trap beavers that were restricting flow of rivers/streams, causing flooding and disrupting stormwater flows.	Continue aggressive maintenance plan for the town owned BMPs with annual inspections. Four beaver trapping permits are issued to stop beavers from restricting flow of rivers/streams, causing flooding and disrupting stormwater flows.
Revised					

4E Revised	Determine appropriate BMP	Public Works Department Public Works Department/Town Boards.	Improve clarity/reduce sediment.	One detention basin was installed for the new housing development at 365 Grapevine Road to reduce and treat stormwater runoff. All proposed new/re-development project plans were reviewed by Public Works Department and by the Project Review Committee (PRC), for appropriate BMPs. All new/replaced CBs are required to be installed with deep sumps. Appropriate BMPs are recommended for use whenever feasible.	Public Works Department and the PRC will continue to review all plans for new/re-development to ensure appropriate BMPs are being implemented.
---------------	---------------------------	---	----------------------------------	--	--

5a. Additions

6. Pollution Prevention and Good Housekeeping in Municipal Operations

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 6 (Reliance on non-municipal partners indicated, if any)	Planned Activities
1F Revised	Operation / maintenance program	Public Works Department	Sweep all streets and clean all catch basins.	Swept 100% of town's roads (approx. 33 miles) and cleaned and inspected approximately 615 CBs.	The annual street sweeping has already been complete for the current permit year and CB inspection/cleaning program will continue as planned.
2F Revised	Employee training	Public Works Department	Conduct catch basin survey for integrity/dry weather flows.	Continued training employees on all outfall locations, proper inspection techniques of outfalls and CBs, and proper actions needed for chemical spills into the stormdrain system.	Continue the training of all public works employees on outfall and CB inspections, and on proper chemical spill actions.
3F Revised	Determine appropriate BMP	Public Works Department Public Works Department/Town Boards.	Installed deep sump catch basins w/ infiltration trenches for new cemetery and Pleasant St. sidewalk & roadwork.	Six non-BMP style CBs were replaced with new deep sump CBs. One detention basin was installed for the new housing development at 365 Grapevine Road to reduce and treat stormwater runoff. All proposed new/re-development plans have to be reviewed the Public Works Department and by the PRC. All new/replaced CBs are required to be installed with deep sumps. Appropriate BMPs are recommended for use, whenever feasible.	The Public Works Department and the PRC will continue to review all plans for new/re-development to ensure appropriate BMPs are being implemented. The Public Works/Highway Department has \$17,000 in their upcoming budget (to be voted on at Town meeting) dedicated to replacing older non-BMP style CBs with new deep sump CBs.

4F	Public involvement	Public Works Department / Health Department	Household hazardous waste collection / public participation.	A community cleanup of Pleasant Pond took place in the second weekend in June 2008. A household hazardous waste drop off day for residents occurred in September 2008.	Pleasant Pond community cleanup days are scheduled annually the second weekend every June. A household hazardous waste drop off day for residents is currently scheduled for September 19, 2009. Additional community cleanup days, for specifically the Miles River, are being discussed.
Revised					

6a. Additions

7. BMPs for Meeting Total Maximum Daily Load (TMDL) Waste Load Allocations (WLA) << if applicable >>

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 6 (Reliance on non-municipal partners indicated, if any)	Planned Activities
1G	Vegetation swales	Public Works Department	Reduce pollutants.	Grass vegetation swales have been installed for the soccer fields near the Iron Rail. Continued to monitor opportunities to use vegetation swales on new/re-development projects and use on existing drainage facilities.	The Public Works Department along with the PRC will continue to monitor opportunities for use of vegetation swales.
2G	Infiltration drain fields	Public Works Department	Reduce runoff.	Continued to monitor opportunities to use infiltration drain fields on new/re-development projects and use on existing drainage facilities.	The Public Works Department along with the PRC will continue to monitor opportunities for use of infiltration drain fields.
Revised					

3G	Dry wells	Public Works Department / Planning Board	Reduce runoff.	Continued to monitor and required all new development in Town to infiltrate roof runoff on-site.	The Conservation Commission mandates that roof runoff be infiltrated for new projects. The Public Works Department and the PRC will continue to monitor opportunities for drywell use.
Revised					
4G	Deep sumps / hooded catch basins	Public Works Department / Planning Board	Reduce sediment / pollutants.	Six non-BMP style CBs were replaced with new deep sump CBs.	The Public Works/Highway Department has \$17,000 in their upcoming budget (to be voted on at Town meeting) dedicated to replacing older non-BMP style CBs with new deep sump CBs.
Revised					Continue to monitor and enforce that all new/re-installed CBs have deep sumps.

7a. Additions

7b. WLA Assessment

Not applicable – Draft Pathogen TMDLs have been prepared for the Ipswich River Watershed and North Coastal Watershed but have not yet been approved by the EPA.

Part IV. Summary of Information Collected and Analyzed

The town's drainage system has been mapped on Geographic Information System (GIS). Approximately a total of 199 outfalls, 615 catchbasins and 114 drainage manholes were located in the field, inventoried using Global Positioning System (GPS) and photographed during the duration of this permit. Any new drainage structures will continue to be located, photographed and added in the field on the Town's online GIS system.

Approximately 615 catch basins were visually inspected during the cleaning program and no dry weather discharges (possible illicit discharges) were noted that had not been sampled during the previous Permit Year 5. Please note, there was no contamination discovered during the sampling/testing of the dry-weather flows in year 5.

Part V. Program Outputs & Accomplishments (OPTIONAL)

(Since beginning of permit coverage unless specified otherwise by a **, which indicates response is for period covering April 1, 2008 through March 31, 2009)

Programmatic

	(Preferred Units)	Response
Stormwater management position created/staffed	(y/n)	N
Annual program budget/expenditures **	(\$)	
Total program expenditures since beginning of permit coverage	(\$)	
Funding mechanism(s) (General Fund, Enterprise, Utility, etc)		

Education, Involvement, and Training

Estimated number of property owners reached by education program(s)	(# or %)	4,500
Stormwater management committee established	(y/n)	N
Stream teams established or supported	(# or y/n)	Y, Miles River Collaborative
Shoreline clean-up participation or quantity of shoreline miles cleaned **	(y/n or mi.)	~0.25
Shoreline cleaned since beginning of permit coverage	(mi.)	~1.50
Household Hazardous Waste Collection Days		
▪ days sponsored **	(#)	1

▪ community participation **	(# or %)	N/A
▪ material collected **	(tons or gal)	N/A
School curricula implemented	(y/n)	N
