Part II. Self-Assessment

The Town of Yarmouth has completed the required self-assessment and has determined that our municipality is in compliance with all permit conditions, except for the provisions as outlined in Part III of this report.

Several large ongoing projects in Yarmouth that relate directly to stormwater and water quality but are not listed in the following sections include:

1. Yarmouth will shortly sign a Town-funded contract with SMAST to complete a flushing study of the Pond watershed as it relates to the existing bridge constriction on Route 28 at Parkers River. The study is a part of the Estuary Study of that watershed, and will determine the potential impacts that bridge widening will have on improving water quality as well as restoring the large salt marsh to the north. We have also applied for a Provisional Project Designation for this bridge replacement project under CZM's Wetlands Restoration Program.
2. We continue to "un-develop" the heavily commercialized Route 28 corridor by purchasing commercial properties, wetlands and creating open spaces with the 1750 House site purchase being the most recent project. We plan to purchase and un-develop the Gardener Tile Building adjacent to Parkers River at the upcoming March 2009 meeting.
3. Yarmouth recently applied for and received a grant through the Cape Cod Commission for a "Does It Work?" Study of a potential Stormwater Management Utility for the Town. The initial workshop is planned for May 2009 and the results of the study will be made available to other Cape towns.
4. For many years we have been working with the Army Corps of Engineers to improve the flushing of the Pond, which is going eutrophic. The initial studies have been completed, and in May we will be asking for a Prop 2009 for the Town's share of the multi-million dollar construction project.
5. Last year, Yarmouth became the first Cape town to use porous pavement to address stormwater infiltration in a wetland, and we plan to use porous pavement for the parking lot at the proposed 1750 House site parking area.

Unfortunately, we must also note that anticipated budget cuts may severely curtail, if not entirely eliminate, our stormwater waste collection, street sweeping and basin cleaning programs in 2009/2010 – see Items 1-5, 2-5, 7-2 and 7-3.
