Part II. Self-Assessment

We have teamed with the Sudbury Assabet Concord Community Council's Water Quality / Water Quantity Sub-committee to provide some of these services. In 2006, the Town had a 40-scale flight done to integrate into our Geographic Information System. This allowed the Town to map most of its outfalls from what could be seen from the air. The DPW has since secured funding to have all the outfalls mapped through GPS, integrated into the GIS system, and also have the outfalls sampled for illicit discharges.

Mass Highway Department and the Mass Turnpike Authority have combined into Mass DOT, and will file a joint NOI with EPA. Mass DOT facilities traverse the Town of Grafton and have a significant impact upon our receiving waters. We are hopeful that we can continue to foster a positive relationship with these entities.

The Department of Public Works has continued the street sweeping program. During the spring, we sweep the entire Town. We concentrate on industrial/commercial areas first and then move our way out to the remaining roadways.

The Department of Public Works proposed a storm water bylaw, which was approved by the Board of Selectmen, and was approved by Town Meeting vote in May 2009.

The Conservation Commission proposed an illicit discharge bylaw, which was approved by the Board of Selectmen, and was approved by Town Meeting vote in May 2009.

The Department of Public Works has continued with the policy of using only salt for winter road clearing operations. This has significantly improved storm water quality in Town by minimizing sand deposits entering resource areas from roadways and catch basins.
