Part II. Self-Assessment

The Town of Hatfield, Massachusetts has continued its ongoing Phase II Program. Additional mapping of the Hatfield drainage system is an ongoing process, and the DPW continues to map outfalls and structures that were not previously on the master drainage system plan. Mapping is approximately 95% complete. The Town Departments have continued to have discussions with GIS representatives with hopes of mapping additional Town infrastructure. Additional public education and participation events continue to provide information about stormwater pollution and mitigation efforts. Finally, good housekeeping techniques such as catch basin cleaning and street sweeping are performed as required in high priority areas.

Changes were made during past years to the Hatfield Stormwater Management Zoning Bylaw and adapted by the Hatfield Board. These changes reflect current EPA Rules and Regulations. An Illicit Discharge Program was developed during past years and incorporated into the Hatfield DPW Rules and Regulations. Enforcement of rules and bylaws continues.

In accordance with the NPDES Phase II Stormwater requirements, the following topics were evaluated for the completion of the Annual Report:

1. Compliance with the Phase II Permit Conditions
2. Appropriateness of the Selected BMPs
3. Progress Towards Achieving the Program's Measurable Goals
4. Results of Any Information that has been Collected and Analyzed
5. Activities for the Next Reporting Cycle
6. Changes in Identified BMPs or Measurable Goals

The Town has determined that our municipality is in compliance with all permit conditions.
