## Part II. Self-Assessment

The town of West Newbury is progressing well in achieving the goals stated in the original Notice of Intent for Phase II of NPDES. The Selectmen has adopted new By-Laws.

In addition to the requirements and outline shown in our progress report the Planning Board in conjunction with other boards has approved new Rules and Regulations that contains positive requirements that will help reach our goals. Included are provisions for competent supervision of projects, site cleanup requirements, catch basin details, and sedimentation control details.

These changes reinforce other department's requirements to achieve the goals necessary to be in compliance with NPDES phase II.

Our maintenance efforts continue to be ongoing and new people and organizations are being brought on board to increase or effectiveness.

We have signed on with Merrimac Valley Planning Commission and are using their resources which help us tremendously with reaching our goals of full compliance with the MS4 Stormwater Regulations and our own goals of protecting our natural resources.

In addition to the work in progress we plan on continuing these practices as outlined in the present permit until the new guidelines and permit are issued. At that time we will update all of our maintenance and good housekeeping measures as required by the new permit.
