Part II. Self-Assessment

The Town of Paxton completed our town-wide mapping of all outfalls (115) on paper with inspection logs and has located outfall waypoints in an electronic file stored on a CD. No illicit discharges were found.

The Town purchased a new state of the art street sweeper in 2006 which has improved our maintenance capabilities relating to our stormwater infrastructure.

The Town joined with five other communities, Wachusett Earthday and the DCR to establish a Regional Hazardous Waste and Recycling Collection Center to help prevent hazardous materials from being dumped into the watershed.

The Paxton DPW joined the Greater Leicester Water Resource Group to share resources and collaborate on regional stormwater & other water related issues.

Paxton along with twelve other towns were successful in receiving a \$310,000 Community Initiative Grant to assist in the future compliance of the stormwater regulations. This grant will be used to educate town officials and the public in stormwater management along with developing a Stormwater Preventive Maintenance Plan, Regional online database, Sump pump discharge policy and regional stormwater system mapping intergration.
