## Part II. Self-Assessment

In March 2005, the Veterans Administration (VA) issued a directive which requires the Veterans Health Administration (VHA) and other VA Administrations and Staff Offices develop governing environmental policy and appropriate guidance for the development and implementation of Environmental Management Systems.

Subsequently the VHA implemented the Green Environmental Management System (GEMS) program, which provides a systematic framework for VA medical centers to manage their environmental "footprint," (i.e., the environmental impact associated with the operation of facilities and delivery of services). When implemented as part of the overall management system of a VA medical center, GEMS provide a set of processes and practices that enables a VA medical center to:

- (1) Identify and address the impacts that the VA medical center's work has on the environment;
- (2) Evaluate how environmental programs are managed;
- (3) Ensure compliance with applicable environmental requirements;
- (4) Determine opportunities for further and continual improvement;
- (5) Manage environmental responsibilities in a proactive manner and pay greater attention to environmental regulatory responsibilities;
- (6) Integrate its environmental program with organizational structure, responsibilities, facility planning activities, work practices and processes, organizational goals, operations, and resource allocation;
- (7) Prevent pollution and conserve resources;
- (8) Enhance its image with regulators, patients, the public, and stakeholder groups.

The systematic approach of GEMS allows VA medical centers to better focus on implementation and integration of environmental management programs and take a more inclusive and proactive view of environmental protection. The Northampton VA Medical Center (VAMC) has implemented a GEMS program under the direction of its GEMS Coordinator. During the first term of the MS4 permit (consisting of Years 1 thru 5) focus of the VAMC SWMP was evaluation of the implementation and effectiveness of Best Management Practices (BMPs) as described in the VAMC Storm Water Management Plan to help ensure implementation of the VAMC SWMP by end of Permit Year 5. This Annual Report summarizes on-going progress in continual improvement for the monitoring and measuring of goals and BMPs in the VAMC SWMP during Permit Year 9.

**Part III. Summary of Minimum Control Measures**

**1. Public Education and Outreach**

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 9 (Reliance on non-municipal partners indicated, if any)	Planned Activities
1.3.1	Public Education Materials	GEMS Coordinator	Develop a stormwater section for the Patient Handbook.	Continued to communicate stormwater awareness to various stakeholders (employees, patients, visitors).	Continue with periodic updates to the community through both electronic and hard copy media.
Revised			Communicate stormwater awareness to VAMC employees through electronic publications on the intranet webpage and the VISTA email system.  Communicate stormwater awareness to patients, visitors, and on-site contractors through hard copy publications.	Communicated stormwater awareness verbally to on-site contractors at pre-construction meetings.	Develop a Stormwater Management Awareness Brochure. Ensure this brochure will be provided to all construction contractors working on-site at the Medical Center when picking up their Government Identification Badges.

1.3.2	Training Programs	GEMS Coordinator	Stormwater awareness topics have been incorporated into annual Oil SPCC training for VAMC employees. Present comprehensive stormwater training in addition to incorporation of stormwater awareness topics in other environmental program trainings.	Presentation of comprehensive stormwater training that includes assessment of BMPs and lessons learned was effective in raising awareness in regards to preventing and eliminating illicit discharges.  Comprehensive Stormwater Management Training Power-Point presentation has been uploaded to the Medical Center GEMS Manual intranet webpage.  Coordinated EPA sponsored Rain Garden Training and subsequent Rain Garden installation on September 12-13, 2012.	Continue with annual presentation of comprehensive SWMP training incorporating BMPs and lessons learned.  Stormwater Management Brochure to be developed will be distributed during all SWMP Trainings. GEMS Coordinator will ensure this brochure is also distributed during GEMS Training to all New Employees during New Employee Orientation (N.E.O.).  Ensure Comprehensive Stormwater Management Training Power-Point presentation located at the Medical Center GEMS Manual intranet webpage is current and up-to-date, as this provides a readily accessible
Revised					
1.3.3	Storm Drain Identification Program	GEMS Coordinator	Identify and mark all stormwater catch basins in the VAMC MS4.	On-going seasonal snow-plowing activities continue to be a concern for a small percentage of damaged/missing Drains to River medallions.	Continue with on-going inspection and replacement of damaged or missing medallions (as needed).  Ensure the identification and subsequent marking of all stormwater catch basins continue as an integral part of the Medical Center's Road-repaving Project currently scheduled for the 2012.
Revised					
Revised					

**1a. Additions**

## 2. Public Involvement and Participation

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 9 (Reliance on non-municipal partners indicated, if any)	Planned Activities
2.3.1 Revised	Annual “Clean the Stream” Program <i>This BMP was discontinued.</i>	Not Assigned N/A	Volunteers help clean and maintain the stormwater collection system. N/A	N/A - VAMC anticipated recruiting volunteers to help the VAMC to “Clean the Stream” on an annual basis. This would be an annual one day event to raise awareness by coordinating volunteers to walk the facility outfalls and ponds to remove debris, and raise awareness about the impact of facility operations on the surrounding environment. Volunteer turnout for the event during Permit Year 1 was very poor and due to ongoing maintenance and upkeep by the Grounds Department, there was very little debris to remove. Evaluation of this BMP in Permit Year 2 determined that it offers minimal benefit to the overall implementation and it has been discontinued.	No activities planned as BMP discontinued after Permit Year 2.
2.3.2 Revised	Partner/Support the City of Northampton	GEMS Coordinator	Establish and maintain communication with the City of Northampton Stormwater Program Coordinator.	During Permit Year 9 VAMC continued to maintain regular communication with Mr. Douglas McDonald, Stormwater Coordinator with the city of Northampton.	Continue to maintain and broaden the inter-municipal relationship between the VAMC and the City of Northampton.
2.3.3 Revised	Call Center/Suggestion Box	GEMS Coordinator	Set up a designated telephone extension with a voice mailbox.	During Report Year 9 VAMC continued to operate a designated telephone extension to receive any questions or concerns related to Stormwater. Stormwater Awareness was also communicated to employees on VAMC intranet and in emails to all employees.	Continue to inform employees and the public about VAMC designated telephone extension with voice mailbox for receiving stormwater related concerns or questions.

**2a. Additions**

1. The first addition is for the purchase of new equipment. The equipment was purchased on 12/31/2014 for \$100,000. The equipment is depreciated over 5 years using the straight-line method. The depreciation expense for 2015 is \$20,000.

2. The second addition is for the purchase of new inventory. The inventory was purchased on 12/31/2014 for \$50,000. The inventory is sold on a cost of goods sold basis. The cost of goods sold for 2015 is \$25,000.

3. The third addition is for the purchase of new land. The land was purchased on 12/31/2014 for \$200,000. The land is held for long-term investment.

4. The fourth addition is for the purchase of new buildings. The buildings were purchased on 12/31/2014 for \$300,000. The buildings are depreciated over 10 years using the straight-line method. The depreciation expense for 2015 is \$30,000.

5. The fifth addition is for the purchase of new vehicles. The vehicles were purchased on 12/31/2014 for \$50,000. The vehicles are depreciated over 5 years using the straight-line method. The depreciation expense for 2015 is \$10,000.

6. The sixth addition is for the purchase of new furniture. The furniture was purchased on 12/31/2014 for \$20,000. The furniture is depreciated over 5 years using the straight-line method. The depreciation expense for 2015 is \$4,000.

7. The seventh addition is for the purchase of new office equipment. The office equipment was purchased on 12/31/2014 for \$10,000. The office equipment is depreciated over 5 years using the straight-line method. The depreciation expense for 2015 is \$2,000.

8. The eighth addition is for the purchase of new software. The software was purchased on 12/31/2014 for \$5,000. The software is depreciated over 5 years using the straight-line method. The depreciation expense for 2015 is \$1,000.

9. The ninth addition is for the purchase of new patents. The patents were purchased on 12/31/2014 for \$10,000. The patents are amortized over 10 years using the straight-line method. The amortization expense for 2015 is \$1,000.

10. The tenth addition is for the purchase of new intangible assets. The intangible assets were purchased on 12/31/2014 for \$10,000. The intangible assets are amortized over 10 years using the straight-line method. The amortization expense for 2015 is \$1,000.

### 3. Illicit Discharge Detection and Elimination

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 9 (Reliance on non-municipal partners indicated, if any)	Planned Activities
3.4.1 Revised	Storm Drain Map	Facilities Management Program	Comprehensive AutoCAD map of the drainage system identifying all drainage structures, connections, and outfalls	The map of the facility's stormwater drainage system developed during Permit Year 1 showed no changes to the drainage structures, connections and outfalls during Permit Year 8.	Continue with an annual review of storm drain map of drainage system.  Ensure the identification and subsequent marking of all stormwater catch basins continue as an integral part of the Medical Center's Road-repaving Project currently scheduled 2012.  Incorporate all changes into an AutoCAD map of the drainage system identifying all drainage structures, connections, and outfalls.
3.4.2 Revised	Stormwater Policy	GEMS Coordinator	Implement a VAMC policy that describes potential non-stormwater discharges and prohibitions.	During Report Year 9 VAMC reviewed its published stormwater policy that was issued during Permit Year 2. Because of anticipated new 5 year permit to be forth coming from EPA, no changes were made to the facility's Stormwater Management Policy.	Awaiting new five (5) year permit requirements from EPA for MS4s. If received during year 2012, the facility will revise its Stormwater Management policy to include any and all new EPA stormwater requirements.

3.4.3	Illicit Discharge Detection Program	GEMS Coordinator / Facilities Management Program	Conduct quarterly compliance inspections of the system outfalls to identify possible cross connections through dry weather flow.	During Permit Year 9 documentation of catch basin and outfall inspections showed no illicit discharges.	Revise catch basin inspection form to reflect annual compliance inspections.
Revised			Because no discharges were observed during Permit Years 1 through 8, outfall inspections have been reduced to a frequency of three (3) times annually for "wet" weather and (3) times annually for "dry" weather. Outfall inspections will occur during the Spring, Summer, and Fall.	All catch basin were inspected as required and documented. All outfalls were inspected as required and documented accordingly. Documentation includes "dry" weather and "wet" weather inspections. Outfall inspections occurred during the Spring, Summer, and Fall.	Continue with annual training for Medical Center personnel performing illicit discharge inspections during "dry" and "wet" weather conditions, and document the training. Continue with on-going periodic monitoring of catch basins and outfalls. Inspection sheets to ensure inspections occur as required by Medical Center Policy.
3.4.4	Illicit Discharge Elimination Program	GEMS Coordinator / Facilities Management Program	When illicit discharges are detected the VAMC will work to expeditiously to correct the problem.	No illicit discharges were detected during Permit Year 9.	Continue to monitor for illicit discharges with timely address of any identified discharges.
Revised					
3.4.5	Education Program	GEMS Coordinator	Educate VAMC employees, patients, visitors, and on-site contractors about preventing and eliminating illicit discharges.	During Permit Year 9, GEMS Coordinator presented comprehensive stormwater management training to all Facilities Management employees at the VAMC. Training included information about illicit discharges.	Continue to present comprehensive SWMP training incorporating the revised BMPs and lessons learned to employees who work at or near catch basins and outfalls.

#### 4. Construction Site Stormwater Runoff Control

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 9 (Reliance on non-municipal partners indicated, if any)	Planned Activities
4.2.1	Regulatory Controls	Facilities Management Program	Erosion and sediment control specifications.	<p>Erosion and sedimentation control techniques are now being incorporated into all construction projects occurring at the Medical Center.</p> <p>Conducted preliminary construction project review assessment with regard to the Energy Independence and Security Act of 2007, Section 438. This Act requires Federal Facilities disturbing more than 5,000 square feet of soil to “preserve” or “restore” hydrology of the construction site. Ensure all future construction projects disturbing more than 5,000 square feet of soil are assessed for this requirement.</p>	<p>Continue with inclusion of erosion and sedimentation control techniques in construction, demolition and renovation projects, regardless of total land disturbance.</p> <p>Conduct preliminary construction project review assessment with regard to the Energy Independence and Security Act of 2007, Section 438. This Act requires Federal Facilities disturbing more than 5,000 square feet of soil to “preserve” or “restore” hydrology of the construction site. Ensure all future construction projects disturbing more than 5,000 square feet of soil are assessed for this requirement and documented.</p>
4.2.2	Review and Site Inspection Procedures	GEMS Coordinator	Periodic inspections of erosion and sediment control structures during construction projects.	<p>Formal inspections of construction site(s) occurred during Permit Year 9. An initial inspection was conducted prior to the commencement of construction. Periodic inspections</p>	<p>VAMC Stormwater Management Policy will be reviewed and revised as necessary to require documentation of site inspections for erosion and sediment runoff from</p>

Revised				occurred every 7 days after construction commenced and within 24 hours of a storm event of 0.5" or more. A final inspection occurred once the construction site had undergone final stabilization and all temporary sediment controls were removed.	construction activities.
4.2.3	Enforcement Procedures	GEMS Coordinator / Facilities Management Program	Contractor accountability and immediate correction of inadequate erosion and sediment control structures	Enforcement of contract specifications through Facilities Management Program Director and the VAMC Contracting Officer continued throughout 2011.	Continue to enforce contract specifications through Facilities Management Program Director and the VAMC Contracting Officer.
Revised					
4.2.4	Procedures for Handling Public Comment	GEMS Coordinator / Facilities Management Program	Set up a designated telephone extension with a voice mailbox.	The GEMS Coordinator is the designated individual responsible for implementation of the SWMP. As indicated on the intranet webpage, interested parties may communicate their suggestions, ideas, or observations at anytime directly to the GEMS Coordinator.	Continue to publish information informing employees, visitors and other stakeholders of facility stormwater contact person and how to report stormwater related questions and concerns to the VAMC.
Revised					

**4a. Additions**

**5. Post-Construction Stormwater Management in New Development and Redevelopment**

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 9 (Reliance on non-municipal partners indicated, if any)	Planned Activities
5.3.1	Structural Stormwater Controls	GEMS Coordinator / Facilities Management Program	Identify structural controls in design documents and contract specifications	During Permit Years 1 thru 9 VAMC has not conducted any construction projects disturbing land greater than one acre and post structural stormwater controls have not been necessary.	Continue to evaluate all proposed construction projects for potential implementation of structural controls in design documents and contract specifications.
Revised					
5.3.2	Stormwater Policy	GEMS Coordinator	Stormwater policy should focus on preserving surface water quality.	Medical Center's Stormwater policy continues to support preservation of surface water quality.	Continue with annual review of VAMC Stormwater policy with the goal of publishing new SWMP should new permit requirements be required for the second 5 year permit period by the EPA.
Revised					
5.3.3	Planning Strategies	GEMS Coordinator / Facilities Management Program	Develop planning strategies that focus on avoiding sensitive areas for development.	During Permit Years 1 thru 9 VAMC has not conducted any construction projects disturbing land greater than one acre and post structural stormwater controls have not been necessary.	Continue with evaluation of proposed construction projects for potential impact to sensitive areas of the facility.
Revised					
Revised					

**5a. Additions**

## 6. Pollution Prevention and Good Housekeeping in Municipal Operations

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 9 (Reliance on non-municipal partners indicated, if any)	Planned Activities
6.3.1	Employee Training Program	GEMS Coordinator	Stormwater awareness topics have been incorporated into a comprehensive Stormwater Management Training for those employees who work at or near stormwater catch basins and outfalls.	Presentation of stormwater training in conjunction with required annual spill prevention and safety training has been very effective in raising awareness about illicit discharges. During Permit Year 9 GEMS conducted training on comprehensive stormwater management that included review and assessment of all BMPs.	Continue with annual presentation of comprehensive SWMP training, incorporating assessment of BMPs and lessons learned.
Revised					
6.3.2	Waste Oil Recycling	Grounds Department	Provide designated collection areas for proper management and disposal of waste oil and used cooking oil generated at VAMC.	Waste oil and used cooking oil that is generated throughout the VAMC is collected, managed, and recycled. Waste oil that is not recycled is stored, managed, and disposed of as hazardous waste.	Continue to maintain program and monitor program to ensure oil does not enter stormwater catch basins.
Revised	Oil-Water Separator at Motor Pool	Motor Pool / Grounds Department		Medical Center is still prohibiting contractors from shipping waste oil off-site. All waste oil generated by contractors via construction work is collected, managed, and disposed of as MA hazardous waste. All waste oil generated by contractors is shipped off-site via hazardous waste manifests.	Continue to ensure all waste oil generated by contractors via construction projects is collected, stored, and disposed of as MA hazardous waste using a hazardous waste manifest.  Will add new BMP for Oil-Water Separator in the Motor Pool. While compliance is monitored annually, a new BMP on the Oil-Water separator will ensure annual review, evaluation is documented.

6.3.3 Revised	Catch Basin Cleaning Program	Grounds Department	Reduce the frequency of catch basin cleaning.	Comprehensive catch basin cleaning was conducted by a contractor in July 2008. On-going inspection of catch basins does not show cleaning required at this time. Anticipate new comprehensive cleaning of catch basins to occur in 2011 (3 year cleaning cycles).  Annual catch basins inspection occurred during Permit Year 9.	Revise catch basin inspection form to reflect inspection frequency.  Continue with an annual review of storm drain map of drainage system.  Ensure the identification and subsequent marking of all stormwater catch basins continue as an integral part of the Medical Center's Road-repaving Project currently scheduled 2012.  Incorporate all changes into an AutoCAD map of the drainage system identifying all drainage structures, connections, and outfalls.  Continue annual monitoring of catch basins and outfalls.
6.3.4 Revised	Street Sweeping Program	Grounds Department	Schedule street sweeping based on priority areas.	During Permit Years 3 thru 5 Northampton VAMC has significantly reduced the amount of sand used during winter road maintenance. This has resulted in a reduction of priority areas and the ability to maintain the system through a single annual facility-wide street sweeping program with additional street sweepings subject to intense weather conditions causing increase debris on VAMC roadways. Street sweepings and street leaf vacuuming were documented throughout 2011 and continue to be documented.	Continue to maintain Street Sweeping and Vacuuming program and document the results.
