RE: CITY OF ATTLEBORO'S NPDES PII SMALL MS4 GENERAL PERMIT ANNUAL REPORT #10

Dear Ms. Velez and Mr. Civian

Please find attached herewith the City of Attleboro's NPDES PII Small MS4 General Permit Annual Report #10. This report was prepared in collaboration with the Department of Public Works, the Department of Parks and Forestry, and the Health Department among other City departments.

Should you have any questions or require any clarification on our Annual Report, please do not hesitate to contact me at 508-223-2222 x 3145.

Sincerely,

LEE FULLER

ENVIRONMENTAL PLANNER

Enclosures: 1

cc: The Honorable Kevin J. Dumas Frank Cook, Municipal Council President

Gary Aryassian, Director of Planning and Development

John Clover, Superintendent of Public Works

James Mooney, Health Agent

Part II. Self-Assessment

The City of Attleboro has completed the required self–assessment and has determined that our municipality is in compliance with all permit conditions, except for the following provision:

Part II.F

BMP 2-2 ("Stencil catch basins with "don't dump" message.") was not met; this BMP will be completed as an ongoing project within the City.

Part III. Summary of Minimum Control Measures

1. Public Education and Outreach

BMP ID#	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non–municipal partners	Continuing Activities
1–1	Article/brochure about stormwater mailed to residents and businesses	Environmental Planner	An article/brochure made available at City Hall and the public library and distributed to all residents and businesses during Permit Year 2 and Permit Year 4.	indicated, if any) 16,000 stormwater education brochures specific to the City of Attleboro were printed and purchased. Brochures were distributed to the public at City Hall and other appropriate municipal buildings. A malfunction with the City Tax Collector's mail folding machine precluded mailing the brochures in utility bills. Several hundred brochures were mailed out by the Conservation Commission during permit Year 9 as part of an education program throughout the City.	The brochures will continued to be mailed out and used for educational purposes as part of the Conservation Commission duties and will be available at City Hall and throughout municipal buildings, libraries and schools for public distribution. Additionally, the Conservation Commission will perform a forth round of mailings of their wetland/stormwater brochure in Permit Year 10.

		1 varie		indicated, if any)	
1–13	Post signs and develop and distribute brochures on Wall Street Highway Yard Stormwater Improvements project	Department of Public Works / Environmental Planner	Post signs and distribute information describing the project and its water quality benefits upon completion of construction.	This project entailed the implementation of a comprehensive stormwater management plan for the City's DPW Wall Street Highway Yard. The project was funded in part by a grant from DEP's Section 319 Non–point Source Pollution Competitive Grant Program. The City closed out the project through the EPA in June 2008.	The project is closed and no further activities are anticipated in relation to this project.
1–14	Distribute and display stormwater education materials within public buildings.	Environmental Planner	The number of days display is available. The number of brochures distributed.	Stormwater education brochures and a portable informational display kiosk specific to the City of Attleboro and the Ten Mile River Watershed have been designed in conjunction with the Ten Mile River Watershed Stormwater Education Project funded by a §604b grant from DEP. In addition, general stormwater outreach materials including brochures and posters have been received from EPA. The stormwater brochures are made available to construction contractors and the public at the following City offices: Planning Department, Building Inspection Department, and DPW.	The City will continue to ensure that watershed specific stormwater education materials including the display kiosk are displayed regularly at City Hall, the Attleboro Public Library, and other public buildings.

2. Public Involvement and Participation

BMP ID#	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non–municipal partners indicated, if any)	Continuing Activities
2–1	Comply with state public notification guidelines at MGL Ch. 39 Section 23B.	Department of Public Works / Environmental Planner / Health Dept	Public notices posted in designated locations.	Public notices are posted in compliance with MGL Ch. 39 Section 23B requirements.	The City will continue to post proper public notices.
2–2	Stencil catch basins with "don't dump" message.	Department of Public Works	The number of catch basins stenciled.	Stencils with wording: "Dump No Waste Drains to River" and "Dump No Waste Drains to Ten Mile River" have been ordered and received.	The DPW has begun costing and budgeting for the installation of metal drain markers throughout the City. It is anticipated that this take will begin in FY2013.

3. Illicit Discharge Detection and Elimination

BMP	BMP Description	Responsible	Measurable Goal(s)	Progress on Goal(s) -	Continuing Activities
ID#	_	Dept./Person		Permit Year 10	
		Name		(Reliance on non–municipal partners	
				indicated, if any)	
3–1	Conduct dry weather outfall screening	Department of Public Works	The percent of outfalls screened.	The City has mapped its stormwater collection system (see BMP 3–2 & 3–3) including all of its known outfalls. A total of 549 outfalls have been identified and mapped using a geographic information system (GIS). City staff, along with an engineering consultant, have attempted to field locate each outfall and screen each for dry weather flow. A total of 405 outfalls have been located and screened in the field. The locations (including x, and y coordinates) of each outfall have been inputted into the GIS (see also BMP 3–2 & 3–3) along with a photograph, and	City departments will continue to monitor outfalls throughout the City and notify the Environmental Planner of any suspicious flows within the City.
2 2	3.5		3.5 0.11.1	field notes relating to dry weather flow.	
3–2	Map stormwater outfalls and receiving waters	Environmental Planner / Department of Public Works	Map of all known outfalls and their receiving waters created.	The City has mapped its stormwater collection system (see BMP 3–1 & 3–3) including all of its known outfalls and their receiving waters. A total of 549 outfalls have been identified and mapped. The stormwater collection system has been included as a separate layer in the City's GIS system (see BMP 3–3). The locations of outfalls have been field–verified and located using either GPS technology or traditional surveying techniques. This information has been inputted into the GIS system.	The City will continue to update the GIS system as needed.

BMP	BMP Description	Responsible	Measurable Goal(s)	Progress on Goal(s) -	Continuing Activities
ID#	DMF Description	Dept./Person	Weasurable Goal(s)	Permit Year 10	Continuing Activities
$1D\pi$		Name		(Reliance on non–municipal partners	
		Tailie		indicated, if any)	
3–3	Map the stormwater collection system in a GIS	Environmental Planner / Department of Public Works	Create map of stormwater system.	The City has mapped its stormwater collection system (see also BMP 3–1 & 3–2) including all of its known catch basins, pipelines, manholes, and outfalls. The stormwater collection system has been included as a separate layer in the City's GIS system. DPW maintains records of all drainage system repairs, upgrades, and expansions.	The stormwater collection system layer of the GIS system has been revised to include field—verified locations, descriptions and screening data for each identified outfall (see BMP 3–1 & 3–2). The GIS drainage layer will continue to be revised and updated as existing structures are repaired or modified, and as additional drainage components (e.g. new developments or new structures added to existing systems) are constructed.
3–4	Develop and implement plan to identify and remove non–stormwater discharges	Environmental Planner / Department of Public Works	Number of illicit connections found and removed.	The City has attempted to field locate each outfall and screen each for dry weather flow. A total of 405 outfalls were located and screened in the field. Conditions at each outfall were noted and a photograph was taken of each. This information has been included in the stormwater layer of the City's GIS system. A total of six (6) outfalls with dry weather flow and/or obvious signs of contaminants were noted and were evaluated further for evidence of illicit connections. This further evaluation did not identify any evidence of illicit connections to these outfalls and the source of flows in each was determined and found to be innocuous or an isolated event. As the source of dry weather flow to each outfall was identified and determined to be from a source other than illicit connections, no TV inspections were necessary.	The City will continue to evaluate dry weather flows and inspect drainage components for illicit connections as necessary. A database will be developed to track inspections and observations of dry weather flows. Those outfalls with dry weather flows suspected of contamination will be investigated.

DME	DMD : :	D '11	M 11 C 1/	D C 1/)	C .: . A .: .:
BMP ID#	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non–municipal partners indicated, if any)	Continuing Activities
3–5	Develop ordinance that prohibits non—stormwater connections to the municipal separate storm sewer system (MS4), gives the City authority to access buildings to search for illicit connections, and allows the City to require redirection of any illicit connections found.	City Attorney / Planning Department / Department of Public Works	A draft ordinance developed and presented to Municipal Council.	The City of Attleboro adopted a Stormwater Management Ordinance on April 15, 2008 that prohibits non— stormwater connections to the municipal separate storm sewer system (MS4), gives the City authority to access buildings to search for illicit connections, and allows the City to require redirection of any illicit connections found. The Conservation Commission adopted stormwater regulations in June 2008.	The Conservation Commission will administer the City of Attleboro's Stormwater Ordinance and Regulations.
3–6	Continue inspection of new construction for correct connection	Department of Public Works / Dept of Water and Wastewater	New construction inspected.	The Department of Water and Wastewater inspects every permitted connection for new construction to ensure that water and sanitary sewer lines are correctly tied to municipal service lines. The DPW and Conservation Commission inspect new stormwater management system components to ensure that they are constructed in accordance with approved plans.	This program will continue to ensure new construction is constructed property.

6. Pollution Prevention and Good Housekeeping in Municipal Operations

BMP ID#	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non–municipal partners indicated, if any)	Continuing Activities
6–1	Employee training program.	Department of Public Works / Environmental Planner	The number / percent of DPW employees who receive stormwater training each year.	The City performed a two day training session with Horsley Witten Group for DPW and Planning Department Personnel which concentrated on LID development and maintenance of LID systems as well as general Stormwater system maintenance. Personnel from the DPW, Forestry, Parks & Recreation, and Health Departments have received brochures and educational information relating to stormwater pollution.	Appropriate staff will continue to receive training and educational information pertaining to stormwater pollution throughout the permit term. Information will be specific to activities routinely undertaken by City employees in the performance of their regular duties. Training may coincide with spill prevention and response training provided by Health Department (see BMP 6–7).
6–2	Continue street and parking lot sweeping.	Department of Public Works	Tons of material removed from roadways and public parking lots annually.	The Department of Public Works swept each public street and parking lot during the spring using both City—owned and contracted sweepers. In addition, downtown streets are swept twice weekly throughout warm weather months and others may be swept during the year on an as—needed basis. Material is properly disposed of as cover in a permitted City—owned landfill. The City removed an estimated 954 cubic yards of sand and debris from City roadways during Permit Year 10.	The City will continue to sweep all public streets and parking lots.

BMP	BMP Description	Responsible	Measurable Goal(s)	Progress on Goal(s) -	Continuing Activities
ID#	Ziii Zesenpusii	Dept./Person	Medical asic Goal(s)	Permit Year 10	Continuing Tienvines
		Name		(Reliance on non–municipal partners	
		1 (0)		indicated, if any)	
6–3	Storm drain maintenance	Department of Public Works	Percent of catch basins cleaned annually.	The City maintains an estimated 3,730 stormwater catchbasins. The Department of Public Works cleans catch basins regularly throughout the year using a truck mounted "clam shell" device. In addition, a contracted "vactor" truck is hired as needed to remove accumulated sediments from drainage structures when it is determined that City—owned equipment would be inadequate to remove the material. Residuals are properly disposed of as cover in a permitted City—owned landfill. An estimated 260 catch basins were cleaned — with an estimated 330 cubic yards of sand and debris removed — during Permit Year 10. DPW staff evaluates maintenance needs including equipment and record keeping in an effort to	The City will continue to maintain drainage structures and remove accumulated sediments from catch basins and pipelines as needed. DPW staff will utilize the GIS system to better track catch basin and drainage line cleanings and prioritize work.
6–4	Evaluate street sweeping and catch basin cleaning equipment	Department of Public Works	Evaluation of existing equipment.	prioritize work and improve efficiency. The City DPW currently operates one truck mounted "clam shell" device for cleaning catch basins. In addition, the City operates two street sweeping vehicle and several smaller motorized sweepers for cleaning small parking lots and sidewalks. Each Spring, the City contracts with a private vendor for additional street sweeping services. The City purchased one new street sweeping vehicle during Permit Year 2.	The DPW is considering the purchase of a "vactor" truck to more efficiently clean basins and drainage pipelines (see BMP 6–3). The purchase of this type of vehicle is currently included in the City's Capital Improvements Plan for FY 2013 as a "Priority 1" project.

BMP ID#	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non–municipal partners indicated, if any)	Continuing Activities
6–5	Roadway deicing	Department of Public Works	Reduction in the amount of deicers used (compared to past years with similar snowfall and demand) and environmental impacts.	The DPW along with private contractors working under DPW direction implement the City's winter roadway deicing program. Roadways are treated with a mixture of sand and salt as conditions warrant. Downtown streets are treated with salt only. During winter 2012, the City applied an estimated 3,129 tons of sand, 5,029 tons of salt to City roadways and 11.86 tons of ice melt on sidewalks. The sand / salt mixture is stockpiled under separate cover. DPW staff evaluated the deicing program to improve efficiency and effectiveness and to limit the amount of deicing materials placed on roadways while maintaining public safety.	DPW staff will continue to monitor industry standards and utilize methods of roadway deicing that are efficient and effective.
6–6	Proper snow disposal	Department of Public Works	Designated snow disposal areas identified.	DPW staff has reviewed DEP's snow disposal guidelines and have sought to identify appropriate snow disposal locations within close proximity to downtown. Only snow removed from roadways and sidewalks within the downtown business district are transported for disposal. Several public and private parcels that meet DEP disposal guidelines were identified and utilized during the winter 2007–2008.	DPW staff will dispose of snow removed from roadways and sidewalks in accordance with DEP disposal guidelines.

BMP ID#	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non–municipal partners indicated, if any)	Continuing Activities
6–7	Continue spill prevention and response training at DPW facility.	Department of Public Works / Health Department	The periodic training of employees	The Health Department retains the services of an outside waste management consultant to provide periodic spill prevention and response training to DPW employees working at the Wall Street Highway Yard. Participants are provided with handouts including a training manual for spill response a copy of the <i>Emergency Response Guidebook</i> . The City has also purchased two self—contained portable spill response kits, which are maintained at the Wall Street Highway Yard. Personnel are trained in the appropriate use of these materials as first responders to a spill of oil or hazardous materials.	Training session will be held periodically as needed according to employee turnover.
6–8	Develop written spill prevention and response plan for DPW facility.	Department of Public Works / Health Department	A written spill response plan developed and updated annually.	The Health Department has constructed a new hazardous waste storage building to temporary store wastes collected from the public (see BMPs 6–15 & 6–16) and from municipal operations. This new hazardous waste storage building is located at Pond Street.	The Health Department will continue to utilize the new building for its hazardous waste storage and will develop a SPRP plan for the new facility.
6–9	Continue to maintain hazardous materials inventory.	Department of Public Works / Fire Department / Health Department	Maintenance of hazardous materials inventory system.	The Health Department and Fire Department maintains an inventory of hazardous materials used by City departments as well as documentation of hazardous waste generated and disposed of by the City.	The Health Department and Fire Department will continue to document hazardous materials and waste used and generated by City departments.

BMP ID#	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 10 (Reliance on non–municipal partners indicated, if any)	Continuing Activities
6–10	Minimize impacts from vehicle maintenance	Department of Public Works	The reduction in amount of hazardous materials used.	The DPW minimizes the use of hazardous materials at their Wall Street Highway Yard to the extent practicable.	The DPW will continue to explore ways to minimize the use of hazardous materials at their Wall Street Highway Yard.
6–11	Minimize impacts from vehicle washing.	Health Department / Department of Public Works / Fire Department / Police Department	Investigate current vehicle washing practices and recommend improvements. Decline in use of soap. Switch to biodegradable soap.	The Health Department has investigated vehicle—washing practices by the DPW, Fire, and Police Departments and is searching for an appropriate biodegradable, phosphorus—free detergent for these departments to use.	An appropriate biodegradable, phosphorus—free detergent will be identified and purchased for the DPW, Fire Department, and Police Department to use when washing vehicles.
6–12	Park and landscape maintenance.	Park & Forestry Department / Recreation Department	The amount of herbicides & fertilizers used.	Park & Forestry Department field personnel are trained in the proper application of fertilizers, herbicides, and pesticides at all City parks. In addition, the Recreation Department is staffed by one licensed pesticide applicator that is responsible for the application of all fertilizers, herbicides, and pesticides at City recreation facilities. These departments keep records of the amounts of these materials used throughout the year.	The Park & Forestry Department and Recreation Department will continue to staff trained personnel. These departments will also maintain records of fertilizers, herbicides, and pesticides used.
6–13	Continue tree planting and maintenance program.	Park & Forestry Department / Recreation Department	The number of trees planted.	The Department of Parks and Forestry planted approximately 20 trees on public roadways and properties during Permit Year 10. The City has also continued development of the tree farm for use for City projects and currently has 65 trees in the tree farm.	The tree–planting program will continue and the City tree farm will be maintained.

6–14	Illegal dumping control.	Department of Public Works / Health Department	The number of signs posted. The number of sites cleaned up	The Health Department routinely investigates reports of illegal dumping of waste throughout the city. The Health Department attempts to identify the responsible party and order cleanup. When necessary, the DPW will remove waste material for proper disposal. Signs are posted warning of violations for illegal dumping. The Health Department and/or DPW posted signs and removed	The Health Department will maintain records of all identified illegal dumping areas and cleanup/enforcement actions.
				waste from dumping areas.	
6–15	Continue to hold Annual Household Hazardous Waste Collection Day.	Health Department	Household hazardous waste collection monthly during non–winter months. Bulk items collected by appointment throughout the year.	The Health Department conducted collections for paint products, automotive wastes, batteries, and fluorescents for city residents on the first Saturday of the month from April through November. This program was used by an average of more than 232 residents per event and collected approximately 1,635 tires,4,600 gallons of waste oil, 5,335 gallons of latex/oil paint, 300 gallons of antifreeze, 820 propane tanks, 33,320 linear feet of florescent lamps, 173 auto batteries, 255 tons of CRT/electronics, 3 5-gallon pails of mercury containing devices, 41 fire extinguishers, 29 incandescent/quartz/halogen bulbs, 322 pounds of ballasts, 360 u-tube lamps, 16 HID lamps, 83 u-tube/biax/circular/exit/flood bulbs, 990 gallons of aerosol cans and 495 gallons of used oil filters. All waste material collected was received by a licensed waste disposal contractor and removed for	The Health Department has scheduled paint product and automotive waste collection days for the first Saturday of the month from April through June and from August through November. These events will be held annually.

6–18	Implement stormwater improvements at Wall Street Highway Yard	Department of Public Works / Environmental Planner	Construction of stormwater improvements project.	This project entailed the implementation of a comprehensive stormwater management plan for the City's DPW Wall Street Highway Yard. The project was funded in part by a grant from DEP's Section 319 Non–point Source Pollution Competitive Grant Program. The City has completed the installation of all drainage inlets, treatment units, associated pipelines, and one bio–retention filter. Work for the project has been completed.	Construction activities related to this project were completed during Permit Year 4.
6–19	Enter into agreement with Historic Preservation Officer to mitigate potential negative stormwater impacts to Blackinton Houses & Park.	Environmental Planner / Department of Public Works	A written agreement with the Historic Preservation Officer (SHPO) obtained and appended to the SWMP.	The City has received correspondence from the SHPO stating that no agreement is needed to mitigate potential impacts as no work is currently proposed near the Blackinton Houses and Park.	The City will contact the Historic Preservation Officer if any future work is proposed near the Blackinton Houses and Park.

7. BMPs for Meeting Total Maximum Daily Load (TMDL) Waste Load Allocations (WLA)

Not Applicable. TMDLs have not been developed for any of the impaired water bodies in Attleboro.

Part IV. Summary of Information Collected and Analyzed

There is no information or data that was collected during Permit Year 10 that is not included elsewhere in this report.

Part V. Program Outputs & Accomplishments

Programmatic

Stormwater management position created/staffed	(y/n)	No
Annual program budget/expenditures	(\$)	Not Determined

Education, Involvement, and Training

Education, involvement, and Training		
Estimated number of residents reached by education program(s)	(# or %)	90%
Stormwater management committee established	(y/n)	Yes
Stream teams established or supported	(# or y/n)	No
Shoreline clean-up participation or quantity of shoreline miles cleaned	(y/n or mi.)	Yes, 4 Miles
Household Hazardous Waste Collection Days		
days sponsored	(#)	208 Days
 community participation 	(# of residents)	2,000 +/-
 material collected 	(#, pounds, tons or	1,635 tires
	gallons)	4,600gallons of waste oil
		5,335 gallons of latex/oil paint
		300 gallons of antifreeze
		820 propane tanks
		33,320 linear feet of florescent lamps
		173 auto batteries
		255 tons of CRT/electronics
		495 gallons of used oil filters
