Title: Director, Division of Resource Management

Date: 29 April 2013
Part II. Self-Assessment

The Department of Correction (DOC) received correspondence from the Environmental Protection Agency (EPA) on May 28, 2004 determining the Notice of Intent (NOI) submission was administratively complete. From the time the NOI's were prepared and before they were submitted the DOC began a prioritization list of areas for investigation including but not limited to:

- Entry Points into the storm drainage system(s) maintained by the DOC.
- Documentation of discharges points on and off the DOC property.
- Illicit connections identification (None were found).
- Investigation of infrastructure and identification of problem drainage areas.

The facility at Plymouth has few drainage issues.

Construction of a new waste water treatment plant is complete. Area has been stabilized.

No drainage repairs were required although a few catch basins will need to be cleaned out.
Part III. Summary of Minimum Control Measures

1. Public Education and Outreach

7a. Additions

7b. WLA Assessment
Part IV. Summary of Information Collected and Analyzed

The Plymouth Facility has a single outfall. The limited number of drain lines and a single outfall are well documented. The primary drainage system discharges into a detention basin on the property maintained by the DOC. The coming year will require new efforts for inspection of catch basins cleaning and other drain maintenance (as needed). As this is a small facility, no major issues are found associated with the catch basins.

Currently inmate labor is used to pick up litter and other road side debris several times per year.

No illicit connections were found.

Part V. Program Outputs & Accomplishments (OPTIONAL)

Programmatic

| Stormwater management position created/staffed | Yes | Staffed by DRM |
| Annual program budget/expenditures | ($) |

Education, Involvement, and Training
